Thread: [Legit botnets? SSH Botnets](#)

HFMonkey - June 16, 2026, 1:00 pm

So I decided to run a test with AWS I use one server as the controller and I have few servers with a fast port connection, I used an SSH controller that executes on login using .bashrc I hit a dstat server and it capped around 30 gbps.

So has anyone else explored legit botnets?
