Thanks, I noticed that everyone is using active subscriptions with third-party services, while mine works completely offline ?

sanhack1 - June 24, 2026, 2:33 pm

I'm very interested. Could I have a free demo? Can I pay with Litecoin?

DIGINOTH - June 25, 2026, 8:13 am

I received the demo, beautiful and very fast, thanks again, I will consider purchasing the lifetime version when it expires!

Karshiellita - July 2, 2026, 2:38 pm

Does it only cover technical jobs how about other jobs such as customer support or other fields?

DIGINOTH - July 2, 2026, 4:25 pm

(Jul 2, 2026 02:38 PM)Karshiellita Wrote: [\[CITE\]](#) Does it only cover technical jobs how about other jobs such as customer support or other fields?

No, it supports much more than technical jobs. It works for customer support, sales, marketing, HR, finance, healthcare, IT, and virtually any other profession.

If you'd like, you can provide additional context about the position you're applying for. This gives the local AI a better understanding of the interview and allows it to generate more relevant, role-specific responses.

The AI is general-purpose, so it isn't limited to a single field. It can adapt to almost any type of job

interview.

Pr0m3th3us - July 2, 2026, 4:54 pm

Does this work with Teams?

What if there are 2 or more people interviewing me in the teams session?

How does it know what the other person is saying if im wearing headphones?

How does it distinguish each of the individuals in the interview?

What do you need for minimum hardware specs?

DIGINOTH - July 2, 2026, 5:07 pm

How does it know what the other person is saying if im wearing headphones?

How does it distinguish each of the individuals in the interview?

What do you need for minimum hardware specs?

I'll answer everything for you:

Yes. SmartInterview is not a Teams plugin, but it captures system audio using loopback (WASAPI). This means it works with Teams, Zoom, Google Meet, Skype, and any other video conferencing app that plays audio through your PC. In addition, the SmartInterview window is not captured by Teams, OBS, or any other screen-sharing tools. You can see it on your screen, but it is not visible to others when you share your screen.

What happens if there are two or more interviewers?

The app listens to all voices coming through the system audio, since they are already mixed by the Windows audio system. If people speak one at a time, it works normally and responds to the latest question. If two people speak at the same time, the transcription becomes mixed and the response may be less accurate. In that case, you can say something like: "Sorry, I didn't catch that properly, could you repeat the question?"

How does it know what the other person is saying if I'm using headphones?

As mentioned, it captures system audio before it reaches your headphones (loopback). So it works independently of the selected audio output device.

Does it distinguish who is speaking?

It transcribes everything into a single text stream. It cannot identify exactly who is speaking, and simply responds to any detected question.

Minimum hardware requirements:

- Windows 10/11 64-bit
- Modern x64 CPU
- RAM: minimum 8 GB, 16 GB recommended
- Dedicated GPU with CUDA (NVIDIA) or Vulkan support, with at least 4–6 GB VRAM
- It also works on CPU only, but transcription and response generation will be slower

- Disk space: several GB for local AI models (these will be downloaded automatically on first launch)

Awesome that answered everything in detail, i appreciate it. couple more....

Concerning the software, do you need to remote in and set it up or do we do that on our own?

Is it technically malware?

DIGINOTH - July 2, 2026, 5:38 pm

Is it technically malware?

It is not malware. It is a software you run on your computer after selecting your license (1 month or lifetime).

After launching it, the software requires an internet connection because it needs to download a few gigabytes of local AI models.

Once the download is complete, you will go through a simple guided setup that you can easily complete on your own.

You will also receive a PDF manual, and if you need any assistance, you can contact me anytime via email for support ?

(Jul 2, 2026 10:15 AM)sanhack1 Wrote: [\[CITE\]](#) I received the demo, beautiful and very fast, thanks again, I will consider purchasing the lifetime version when it expires!

Sorry for the late reply, I had missed your message.

I'm glad to hear you're satisfied. If you need anything, I'm always available ?

Sound good thank you.

OnlineRanker - July 4, 2026, 12:25 am

Is there any bulk discounts?

DIGINOTH - July 4, 2026, 3:23 am

(Jul 4, 2026 12:25 AM)OnlineRanker Wrote: [\[CITE\]](#) Is there any bulk discounts?

Are you looking to purchase multiple licenses? If so, how many are you interested in?

Stanley - July 6, 2026, 3:31 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Any chance for ban? Is the success high and how many?

ItsMehRAWR - July 9, 2026, 4:38 am

Id like to ask good sir which models are you currently using for this is it ollama models IE mystral family? Are they transformers, do you offer various model sizes as in 120B+. I am looking for a specific model its about 1.6T in size. Can you custom make these? Thank you

DIGINOTH - July 17, 2026, 4:57 am

(Jul 8, 2026 11:55 AM)spins Wrote: [\[CITE\]](#) Any chance for ban? Is the success high and how many?

No tool can guarantee zero ban risk, because it depends entirely on the platform's Terms of Service and how the interview is monitored.

SmartInterview is designed to be discreet: it reads system audio via loopback, works with

headphones, and the window is hidden from screen capture. What we can assure is that, to date, no standard video-conferencing or screen-sharing software actively identifies an application like SmartInterview. That said, every platform has different detection methods.

We don't publish a "success rate" or number of users.

(Jul 9, 2026 04:38 AM)ItsMehRAWR Wrote: [\[CITE\]](#) Id like to ask good sir which models are you currently using for this is it ollama models IE mystral family? SmartInterview uses open-source language models running locally. We do not depend on PyTorch, Transformers, Ollama, or any Python stack: the software uses native inference engines (GGUF for the LLM and native Whisper for transcription) hosted in a lightweight runtime.

We offer multiple precision levels to choose from, and a future update will add the ability to load your own custom model. We do not currently build bespoke models for individual users.

Vagueness - July 21, 2026, 2:56 am

I would absolutely love! To review this man as someone who is actually in between jobs and actively doing interviews this would be a nifty tool to try out!

LittleBroBro - July 24, 2026, 8:41 am

Price seems too good to be true how do we know it'll be around in 2 months or a year?

DIGINOTH - July 31, 2026, 3:49 pm

if you want to have a trial copy let me know ?

(Jul 24, 2026 08:41 AM)LittleBroBro Wrote: [\[CITE\]](#) Price seems too good to be true how do we know it'll be around in 2 months or a year?

the software is already available, if you want to try a demo copy let me know and then you can evaluate the purchase, I wanted to put a low price because the software is new ? watch video:

[Video: <https://vimeo.com/1214727365?share=copy&fl=sv&fe=ci>]
