I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Purchased this product, he took 1 day to deliver (after being quick to accept the money).

The provided product was not at all FUD and is immediately detected by windows, he then ignored me for a day before eventually telling me to use AI to make it FUD.

I gave him about a week to deliver a FUD product as claimed because he said he was travelling, but he continued to ignore me so I asked for a refund and he immediately deleted all messages in telegram, then claimed it was FUD when he provided me with it (I tested it just a couple hours after he sent). Its not known whether it was actually ever FUD, but if it was it was only FUD for about 2 hours with zero spreading before being detected. So kind of a pointless product either way.

At the time he acknowledged that it wasn't FUD and apologised and promised to re-FUD but i had to wait 3 days as he was travelling, then he just blanked me. (Can't show these screenshots as he immediately deleted chat history the moment I asked for a refund after he'd been ignoring me)

Do not purchase this product if you're expecting something that is actually usable, the guy is a scammer. It has now been 8 days since I first made payment and he's largely just ignored me and still hasn't provided a FUD command.

Here is a screenshot of him admitting he deleted our Telegram history (not something a legit person would do)

Sorry but why do you go to a nobody for software when i build anything you want for half the price he charges you... just a simple question? Shame on scammer.
