You ignore it. Popularity rating doesn't matter. If you really want to raise it, then help other members in threads. Don't make low quality posts. Don't argue with others or insult.

I'm not saying that you did any of that, I'm just saying that's usually what causes members to hand out negative ratings.

As far as bytes - <https://hackforums.net/showthread.php?tid=6266699>

The Ruler acts like an appendix... just full of shit.

Welcome to the forum.

Note: Someone should tell that clown, the ruler, to remove the ignore , so I can give him a negative rating that matches his intellectually challenged level.
