Thread: [Unemployed and Feeling Like I'm Wasting Away](#)

cookieblock - June 21, 2026, 2:44 pm

"Anyone else feel like life is brutally beating them?"

I used to have a good life, was good at my job and had a side hustle affiliating other people's products. Now I'm unemployed, sat at home and just wasting away. I feel like I just don't want to do anything.

Anyone else here feel the same?"

Riggs - June 21, 2026, 2:47 pm

Maybe take some time to reflect on what you actually enjoyed about your previous job or hustle and try to channel that energy into something new? Even if it's small, any step forward is better than stagnation.

i need help with important tasks that have to do with hacking, scamming etc. I hack into whatever the task is for the day and you run my tools to sort, correlate and map the data and you then use that data for either, jacking financial accounts from our data and siphon the money. As long as you have some decent knowledge computers and hacking, you'll do fine. Just let me know. Also NO i dont need any money or any type of payment from you. You will just be a paid "employee" i guess you could call it lol

Hey, I'm looking for a hacker partner. I PROBABLY have a greater ability/setup than you. Prove me wrong? :D

I'm a ratter, and using a good method, just need traffic. Ads are a problem for me. And manual spreading sucks.

BUT I just coded a browser automation script. I can basically just tell AI what to do in my browser now/auto spread.

Perhaps we could talk -- maybe I will join you instead? I'm intelligent; and blessed! Let's team up!

Perhaps we could talk -- maybe I will join you instead? I'm intelligent; and blessed! Let's team up! I've been hacking for 16 years, i have tools that I've coded myself to hack into anything. All my tools are functional, working and have been fully tested for effectiveness and no i didn't do a Vs code debug, got an "OK" then said "yup she works" lol i run my tools against systems, they do exactly what they are intended to do. Let me know. if you need tools or guides or anything. I have them. All zero day tools i stg. I did not take someone elses tools and moved shit around and called them "mine." I physically coded them from scratch with zero day methods, payloads and malware. ? loading encrypted image...

Wooooow! I basically haven't spoken to a hacker properly in years, and it's been like 10 years since I had a real partner. But if I could team up with YOU, that would be great! -- Isn't it strange that with AI being released, that this forum is dead? -- I've coded what I deem the best RAT, it's python, but I use a vbs loader that silently installs python. I think python scripts with AES bypass AV, but I'm not sure. I am yet to get many bots, but my method is set up. I use Win+R -- and I came up with that idea myself, then everyone started using it!

Let me know where we can talk, man! -- I would love to see what you have... maybe we can exchange cool stuff! I've got a few things that would be good for you to have! :D

TheGuideGod - June 21, 2026, 4:10 pm
and im down to work together***

Well you can have a job and still feel the same. Life just sucks.

I also feel unemployed because I get distracted easily and can't focus on my tasks. I'm really interested in hacking—I've been learning for the last 2–3 years.

My main problem is that I don't have a mentor. If someone who is good in this field wants to share their knowledge and help me, please PM me. I'm just looking for a friendly mentor who can guide me and give me clear daily objectives.
