Thread: [Would you tattoo your seed?](#)

Pr0m3th3us - June 21, 2026, 5:29 pm

Hypothetically if you could only have 1 wallet with ALL of your crypto, no monero restrictions or whatever BS and didn't (or couldn't) backup your seed, write it down, give it to a trusted family member....etc.

Would you tattoo it in your buttcrack? 6 words vertically along one cheek and 6 words on the other. Inside. It's gotta be like really up in there, right along the line guys....you know what i mean.

Personally, id do it any day of the week, but im mentally fucked so.

mote - June 21, 2026, 5:30 pm

Absolutely not

Way up the butthole?

RiveR29 - June 22, 2026, 12:39 am

And here I was reading this at work at 10.38am

And I mean I would personally not do it, but I mean you can always go for it. I just personally do not know any tattoo artist who would do that.

Alternatively, you could also get an RFID implant with read/write memory and store it there.

Yea but....that's not a tattoo next to your dark star...?

Cool idea though, what about metal detectors? wands? EMP?

The electromagnetic field the copper coil generates is so small it doesn't get picked up at airports. In my exp they can get picked up by wands if they're firmly touching the hand directly. EMP would turn it into a brick, but they're easy to remove via a small incision.

I've got one in each hand myself.

_VOX - June 22, 2026, 7:39 am

I'll tattoo anything and have a bunch of stupid tattoos. I see no reason to stop.

How did you find someone to insert them??? I cant imagine you go to your family doc and say yea i need a surgeon recommended for these...

Even if it comes with the syringe, you would want a local right? I mean that would swell up like a bitch...

Oh wow i just saw the part where it recommends you just go to a body piercing shop...well fuck me. Thats wild.

Exactly. There is no reason.

I just did it myself, no numbing cream or local anesthetic. I'm not gay.

Recorded a melodramatic video if you wanted to see:

It's probably better to have someone else do it, although I've never had any issues.

Nice i've wanted to do that in each hand too. I also wanted like wolverine implants too or assassins creed sleeves... but seriously I want to put them in my hand.

You're the final boss of privacy and being clever.

You can also use those to pay in apple pay places btw?

TB12 - July 11, 2026, 8:51 am

I love tattoos but absolutely fucking not this is completely overkill

Jamika - July 11, 2026, 10:34 am

There's something about this that gives off a gay vibe, but I can't quite put my finger on it.

?ystem - July 11, 2026, 3:21 pm

That would be a definitive no for me. I have a set of rules to abide by when it comes to my tattoos.

No offense to anyone else though, it's your body, and you're free to do whatever you want with it.

Can - July 11, 2026, 5:15 pm

No way. what type of question even is this
