I have been given 150MB of vouch credit, for the residential proxy pool.

I'm going to test the speed of the rotating proxies and report back.

EDIT:

The overall website is great, very clear and understandable. I can choose a country, worldwide, cities and between sticky or rotating proxies.

However during my testing I was not able to use the proxies fully as they all stalled at a certain point of my automation use case. Support was quite helpful and on their side all looked OK, however on my side it wasn't. I'm not sure if there is anyone to blame here. However when testing my automation with another provider and my home IP, I did not encounter the issue.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
