Thread: [HTI Services Data Leak](#)

BorysKv - June 26, 2026, 7:58 am

there is around 25GB datas of a dude who works for HTI Services
the data contains their private photos
ID/National cards
backend and frontend codes of Drone (Horus)
UAV - UAS group files and so on..
there will be some show cases for those who are willing to purchase their data.
this is happening as karma for them they already got enough time.? loading encrypted image...?
loading encrypted image... the (HORUS) drone data price is for 25,000\$
<https://ufile.io/qaqc88f7>
approx = 5GB [warn]

new showcase

jcole - June 28, 2026, 5:52 am

More than likely it is useless.. There could be a niche group of people who could benefit from trade secrets if there are any. Anyhow, you're just a extortionist.

Unless your a terrorist, Vladimir Zelensky, or possibly a ranking member of organized crime, I highly doubt normal people are interested in schematics for attack drones.
