DLL Sideload Dropper - Private Builds in Pure C

What is this?

A custom-built dropper that abuses DLL sideloading through a legitimate signed executable. Your payload runs under the context of a trusted binary. No SmartScreen popups, no Defender alerts, no UAC friction. Double-click execution from download. Clean.

What you get: One signed EXE + one DLL, both required in the same directory. The DLL can be hidden from the target.

Written in pure C. Small binary, minimal footprint, no bloated runtime dependencies.

Bypasses Windows Defender at runtime. If the dropper gets flagged, I replace it without extra charge.

Bypasses SmartScreen and behavior-based detection. No security popups even when downloaded from the Internet.

Custom obfuscation per build. No shared stubs, no recycled templates.

Icon spoofing available: Microsoft Word, Microsoft Edge, Adobe Reader, Visual Studio .sln, and more.

Pricing: \$40 per private build.

Payment: BTC, XMR, LTC, ETH... most major coins accepted.

Delivery: within 24h of payment confirmation.

Contact: Telegram [@pyriteuser](#)

[contract=tid]Start Contract[/contract]

Runtime FUD Proof

Scan performed with a benign payload for behavioral detection reference:

[View Kleenscan Runtime Result](#)

* Output example. DLL and file extension hidden for this demonstration:

? loading encrypted image...

Video test. [\(Click to View\)](#)

Vouches: [\(Click to View\)](#)

Vouch Copies [\(Click to View\)](#)

2 vouch copies available. Requirements: Minimum rank: Ub3r

You provide a test document or program file. I build a dropper that opens it and executes a message box payload.

Scanning with Kleenscan only. VM with automatic sample submission disabled.
You leave a comment with your honest opinion after testing.
DM me on Telegram to request.

Pyrite - July 10, 2026, 3:57 pm

Here's how a build looks with a Edge PDF document disguise:

Transporter007 - July 11, 2026, 3:10 am

Vouch copy available ?

jason123 - July 11, 2026, 1:13 pm

This looks promising, if possible please upload a video tut to see how this work.

Pyrite - July 11, 2026, 1:21 pm

I mean theres no tutorial. If you mean a video showing me executing one of the builds (and not only a screenshot) then yes, i can do that.

Thanks!

0x0000 - July 11, 2026, 1:22 pm

I rarely leave reviews — I bought this guy's main product before, and today I bought the dropper. Everything was done perfectly. DLL is FUD. Recommended.

jason123 - July 11, 2026, 1:24 pm

Done, video in the thread. Sorry for the quality I recorded in my VM haha.

itcorp - July 11, 2026, 2:37 pm

Is there a vouch copy available for analysis?

Pyrite - July 12, 2026, 5:13 am

(Jul 11, 2026 02:37 PM)itcorp Wrote: [\[CITE\]](#) Is there a vouch copy available for analysis?

Hello,

Thanks for the interest but there is a vouch copy going on already (and another completed) so no.

tusena - July 13, 2026, 2:54 am

I'm interested; how many accompanying files does this have?

Pyrite - July 13, 2026, 4:15 am

Hello,

For the dropper to execute you need an exe + dll on the same directory. The dll can be hidden.

Contact me on Telegram if you have more questions.

Thanks.

Pyrite - July 16, 2026, 1:23 pm

Kleenscan build scan 0/36:

Was online for a few weeks for personal reasons. Back online building droppers.

Stanley - August 23, 2026, 5:30 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

NoAccess123 - September 22, 2026, 4:37 pm

Can it be sent on gmail?

Pyrite - September 22, 2026, 11:16 pm

Hello,

You can send through link that downloads it. Gmail doesnt allow to send exe nor dll.

Thanks for your interest.
