RATON ADMINISTRATION TOOL

"A fast, customizable remote access tool with advanced client management and stealth features."

[align=center]Introducing a re-newed cool RAT for everyone and everything. We offer a great list of commands, customization options, and management tools for your day-to-day ratting, we don't just stop only at adding as much as possible, even for our free users, because we want to provide the best possible experience.

This project started a few years ago as a clone of AsyncRAT, with few features and a crappy UI, no estability, but then I decided to change course and create something better, with a customizable, user-friendly UI and a great variety of commands. That's how RatonRAT was born. We specialize in monitoring and trolling

WHAT DO WE REALLY OFFER?

? Monitoring

? Entertainment

? Misc

? Clipper

? Tools

? Builder

3 outputs for all your needs (All-in-one, dll sideloading and less size for crypters)

AND MANY MORE, TAKE A LOOK! ITS FREE AND SAFE

First Comment, Used for a long time can say it is a very good

MadScientist - July 1, 2026, 8:12 pm

Anyone try this? Curious to see users feedback, be safe using a 1 post user dropping binaries. If you need middleman for a transaction DM me ?

sillycs - July 1, 2026, 9:11 pm

Thanks for caring! The program can be easily seen on dnspy

OffCode - July 2, 2026, 8:29 am

It looks great! What language is this written in?

sillycs - July 2, 2026, 5:21 pm

Hey, thanks! All in c# :))

evelyn - July 4, 2026, 12:50 pm

skidded iplogger rat

coocochi - July 5, 2026, 12:49 am

This is as crappy rat, I used it before it got here and I did not enjoy it for one day

asikan34 - July 5, 2026, 11:39 am

I'm creating a membership... but it doesn't accept the membership after the reset. It's absolutely terrible.

Don't be spreading negativity mate the rat works perfect and has the best rolling features out of any rat

Transporter007 - July 6, 2026, 4:02 am

Looks great. I will test it for sure.

KevenLionardo - July 7, 2026, 1:13 pm

another vibecoded async rat or quasar rat.

sillycs - July 7, 2026, 1:57 pm

(Jul 5, 2026 12:49 AM)coocochi Wrote: [\[CITE\]](#) This is as crappy rat, I used it before it got here and I did not enjoy it for one daySorry if you felt that, but we have updated it in many ways

Sorry, but it may be a error from your computer/network, please contact me at my telegram (@sillycs)

Mchenzielee - July 7, 2026, 4:46 pm

If you're still trying to get more installs or quality traffic, feel free to message me. I work with campaigns like this and can explain what options might fit your budget.

signed0 - July 8, 2026, 8:02 am

the delete system32 had me roaring

this looks like xeno with a better skin

wunschwetter - July 10, 2026, 12:43 am

I bought this RAT and it's truly amazing. Very good support if i need help and the seller is very friendly. I just can recommend everyone to get this RAT. Price wise is also very good and not expensive as other RAT's which offer way less for high price.

Dread_xd - July 12, 2026, 2:38 pm

Is the dll sideloading output fud?

diavolo - July 12, 2026, 6:57 pm

Looks good wonder if anyone has tried it.

Mastercarder - July 12, 2026, 7:14 pm

This looks very promising. Will take a look when I get home. Thanks

Dr.MLDS - July 13, 2026, 6:23 am

looks good i will try it

I_H8_KDot - July 13, 2026, 6:43 am

Already seen a crack of the paid version :sob:

Excellet_upkgr - August 16, 2026, 2:11 am

I think the developer of Quasar needs to take a look at this, just like they did with Pulsar.

Chara - August 16, 2026, 2:56 pm

this is a great rat but the newer versions are kinda buggy so i use a older version
also the free version is very generous

closedeyeknight - August 16, 2026, 5:58 pm

Looks good, thanks for sharing.

x64assembler - August 25, 2026, 9:33 am

I remember when it was open source and was a rainbow version of Quasar

besimbicer - September 21, 2026, 8:32 am

Has anyone used it? Would you recommend it? The Pro version costs over \$100.
