Thread: [Overlord RAT Hosting](#)

DramaKing - July 2, 2026, 11:41 am

This service is for people who want a ready-made RAT web panel for a lower cost than renting a VPS or VM yourself. No worries about takedowns, uptime, server maintenance, or other technical details. Want to run Overlord on your own hardware through a secure, anonymized tunnel for the least amount of money? That's an option, too. I've also been customizing an open-source loader using indirect syscalls, staged payloads, and what I believe to be a rather obscure sandbox bypass method. I'm offering that for a \$20 upcharge.

888-RAT is not compatible with the platform, so that's going to be a no. I could set it up on your system, but it costs \$100-200, is outdated, and I can't vouch for its functionality on current systems. It would probably only be worthwhile if you needed Android support.

Thanks for the heads up mate. I appreciate your time

working async rat on you hosting?

DramaKing - September 8, 2026, 8:59 am

(Sep 7, 2026 12:28 AM)ViperPrivacy Wrote: [\[CITE\]](#) working async rat on you hosting? \$10, and you pay for the VPS. Some people seem to completely miss the point that this is a web RAT, not VPS hosting. Plus, Async has nothing but downsides compared to Overlord. I stopped using it years ago.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
