Thread: [HVNC Builder v1.0 Full Source Code & Compiled EXE Included](#)

mohamad123d7 - July 2, 2026, 4:33 pm

? HVNC Builder v1.0 — Full Source Code + Compiled EXE ?

What is HVNC?

HVNC (Hidden Virtual Network Computing) lets you control a Windows desktop completely hidden. The victim sees NOTHING – no window, no icon, no process (if configured). But you see everything and can do everything.

Why is this the most sold product in hacker forums?

Because it's the #1 tool for:

- Session hijacking
- Banking session stealing
- Silent file transfer
- Persistent remote access
- Bypassing UAC & antivirus

What You Get:

- ? Full Python Source Code (server.py + client.py)
- ? Compiled EXE – Ready to Run (no Python needed on target)
- ? Hidden Desktop – No window, no icon, no tray
- ? Live Screenshot Streaming – See what they see
- ? Remote Shell – Full command execution
- ? File Upload / Download – Silent file transfer
- ? Anti-Antivirus Bypass Techniques – Tips included
- ? Persistence Module (optional) – Survive reboots
- ? Telegram C2 Support (optional) – Control via Telegram

What You Can Do:

- ? Control any Windows PC silently
- ? Steal banking sessions without triggering 2FA
- ? Transfer files without the user knowing
- ? Execute any command from anywhere
- ? Keep access even after reboot

Price:

- ? Only \$100(Source Code + Compiled EXE)
- ? \$150 (With Telegram C2 + Persistence + Obfuscation)

Payment: BTC / USDT / LTC

Delivery: Instant – sent to your Telegram or email

Testers & resellers welcome. This is a one-time purchase – no monthly fees.

? Limited copies sold per week to keep it exclusive.

You sending out a few vouch copies? I'd be interested in trying it if so. I can also middleman for anyone who would like to help users from being scammed
