Thread: [Claude Fable 5](#)

CT-ZY - July 3, 2026, 8:33 am

Thoughts about Claude Fable 5 is back.
You guys used it yet?

One can only wonder how much of its ability has now been neutered.

Word is that the guardrails are severe.

I have Fable 5. And the guardrails are ridiculous. Any prompt it doesn't like is automatically switched to Opus 4.7 and your account gets instantly flagged for review.

Riggs - July 3, 2026, 5:48 pm

It's great, but devours tokens so fast. I've actually been approved into their CVP (Cyber Verification Program) but my prompts on Fable still get flagged frequently and downgraded to Opus. It's not clear to me if the CVP extends to Fable yet or not.

That's the same that happened to me. Every time I try to use it it gets diverted to Opus and nothing actually completes on Fable 5 itself. I think the guardrails on Fable are too tight to the point very little is actually processed on it. But for the moment that's alright because on Opus 4.8 I'll /ultracode and deploy 8 agents to code-check, burn a million tokens in about 20 minutes, but I have all the answers I need in those 20 minutes.

I told Fable 5 to research and write a bunch of blog posts about cybersecurity. It then proceeded to write a blog post about prompt injection, and then assessed its own blog post as a red flag which triggered the safeguards and switched itself to Opus 4.8.

4.8.

So basically it told on itself. LOL

Eh its too judgy and it always seems to reach assumptions, Also it often doesn't go into depth regarding a subject unless you know what to ask it or you prompt it to.
