CProp 10\$ No Deposit Bonus - CloseOption Binary Options Prop Firm Trading Platform

Binary options funded accounts or Binary Options Prop Firm Trading Platforms offer traders the opportunity to make trades using a company's money, and earn a pre-agreed portion of any profits, usually 80% to 90% for the user.

There's usually an evaluation phase that needs to be completed first, but at CProp by CloseOption, you will not need to complete any test.

A sign-up fee will need to be paid at almost all Prop Trading Firms, but at CProp by CloseOption, you can start with 10\$ No Deposit Bonus.

CProp by CloseOption: Bonuses, Advantages and More:

CloseOption became one of the first binary options funded account providers after introducing CProp in 2026.

CProp has five funding packages, with account sizes ranging from \$200 to \$5,000. Funds are available to traders immediately after paying for the chosen package. The payment starts at \$8 for a trading package with a starting balance of \$200, and can increase to a payment of \$100 for a trading package with a starting balance of \$5,000.

Pros

10\$ No Deposit Bonus to Buy Your First Trading Package - [Click Here to Open A CProp Account](#)

Low entry cost across all challenges, starting from \$8

The same rules apply across all packages and funding levels

No deadline to complete the evaluation phase

An 80% profit split for successful traders

Cons

Pretty small funded account sizes at the entry level – just \$200. At this moment, this Prop Trading Firm is recommended for beginners.

Trading Rules:

Each package uses the same two-stage evaluation process:

In Step 1, you must grow the account by 8% to pass. For example, a \$1,000 account will need to hit

\$1,080.

In Step 2, you then need to make a further 7% on that stage's starting balance. For example, if Step 2 also starts with \$1,000, you would need to reach \$1,070 to pass.

Risk Management

Maximum daily drawdown (3%)

Maximum lifetime (total) drawdown (5%)

Trading Volume Consistency Rule

also trading for a minimum of 6 separate trading days

CloseOption also applies a trading volume consistency rule, meaning your daily volume must stay in line with your highest previous daily volume rather than dropping off after a strong day.

After completing all steps, you can receive a funded account, but failure to follow these rules may result in account termination. At this stage, you become eligible to withdraw 80% of the profits generated on the funded account, with withdrawals available every 21 days, with 100% Refund for the Package Fee (on first withdrawal).

CloseOption is one of the first real funded account providers we've seen for binary traders.
