Thread: [Deepfake for Video calls \(Zoom,Discord,Teams etc.\)](#)

trucjzk3 - July 10, 2026, 11:06 am

Hello,

We represent maskify.net , an all in one solution for people looking to hide their true identity during video calls.

The price is \$1500 monthly, with discounts on 3-month plans.

Maskify doesn't collect any information on you and all face swapping happens locally on your device.

It is possible to try the software for free as a trial for 3 days.

The trial version is limited in features, has a watermark and doesn't allow output.

All information can be found at our website <https://maskify.net/>

Please keep in mind that maskify.net doesn't allow users to run fraudulent actions with it. Maskify.net is only meant for you joking around with your friends and for educational purpose.

We accept dealing through middlemen and we also agree to give out a few vouch copies.

Post a reply in this thread if you are interested in a vouch copy.

[contract=tid]Start Contract[/contract]

DramaKing - July 10, 2026, 9:24 pm

Too bad the price is absurd.

Undead - July 11, 2026, 12:48 am

Would be interested in a vouch copy if its available.

trucjzk3 - July 11, 2026, 1:55 am

(Jul 11, 2026 12:48 AM)Undead Wrote: [\[CITE\]](#) Would be interested in a vouch copy if its available.

Would be happy to give you a copy to try the full software for a week.

Contact us on telegram, it's written on our website.

??????? - July 11, 2026, 4:44 pm

Contact me via PM and I'll review it for you if you're giving me a vouch copy. I'd be glad to thoroughly review it as I've done with many products here.

A\$APKING - July 13, 2026, 9:14 am

Looks like a good project, but sounds to expensive.

Mr. Fantastic - July 14, 2026, 7:32 pm

i would like to take a vouch copy if available. i have daily work with faceswaps .

Qrentx - July 17, 2026, 11:15 am

We appreciate your interest in our service but we currently do not offer vouch copies.

Kontraktnik - July 17, 2026, 11:26 pm

No software preview, I understand you may have worked hard but you should start with affordable pricing, some people just want to stay anonymous during videos call 2-3times a month, not much of them will pay 1.5k :/ GLWS

Vagueness - July 21, 2026, 2:49 am

Really sick idea and premise not to mention the tech behind the project. But the price you are asking is bat shit insane respectfully

MaxPayne - July 22, 2026, 8:07 am

No little script kiddies here will pay you \$1,500 a month thats almost what a lambo costs lmao

trucjzk3 - July 23, 2026, 4:55 pm

Not really sure why you replied here like this :D

Stanley - July 23, 2026, 4:55 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

juulstar - July 26, 2026, 2:05 am

GLWS.

For anyone who wants to avoid spending an absurd amount of money on this, here's a good starting point to explore. Open source project which is out of date, but if you wished to tamper w/ AI, you could get something going.

<https://github.com/sensity-ai/dot>

There's also many, many cheap or free tools to spoof the virtual cam as a real webcam on real hardware.

Especially considering the vouch copy doesn't allow output. So that won't be much of a trial.

DevilGru - September 16, 2026, 2:18 am

The pricing is insane. There are many free deepfake tools which supports deep faking in high quality with definitely low prices.

You should provide the demo version with watermarks on it. If not, this is definitely like a shitty scam.

trucjzk3 - September 18, 2026, 1:42 pm

We offer free trials for 1 day, full usage as paid versions. Hit us up.

Honey Singh - September 20, 2026, 12:04 am

You must consider lowering the price,
Look promising tbh.

trucjzk3 - September 20, 2026, 10:07 pm

Hello,

Currently there are 9 people subscribed to our software, extending their subscriptions monthly.

Some are using it for KYC liveness verifications, other for video calls.

The software gets improvements on a weekly basis, the effort put into it & the results it brings it's subscribers is what sets the price.

The price will be increasing to \$2000 once there are 10 subscribers.

Existing subscribers will keep the existing pricing model as long as they keep their subscription active.

Our telegram <https://t.me/maskifynews> for the most recent updates.

1 day trials are still offered.

7 - September 20, 2026, 10:25 pm

So is this like a hosted deepfacelive services? on a decent chip and feedback a stream to a virtual driver im guessing?

trucjzk3 - September 20, 2026, 10:39 pm

Your guess is wrong, if you read the website or our post you'd see it isn't hosted anywhere, the swap is processed locally.

DFL is also outdated and requires way too much computing power to run properly.

Okey just wondering. When you say locally you mean consumer local or your local?

Btw, nice website. Ill look more at that rather than ask questions.

Everything is client sided, we do not see any swaps that happen or keep recordings of anything.

The only data that is tracked is related to license and fair usage.

The minimum requirement for the software is a RTX 3080, desktop version.

Currently the software is able to provide ~60 fps on a RTX 4090 with appropriate settings.

The software has the capability of processing every 2nd frame as well in order to work on lower end machines, meaning that it is also possible to use a 3070Ti, however it is not ideal.

Thats nice yeah! tbh DFL is very resource heavy was looking into new ideas actually using NPU to accelerate. But looks good I might give it a try I know a few people who could use it.
