for that you can use the search function on your upper right. make sure to only use reputable sellers and always do deals on-site + contract on here.

in terms of making money, either you sell something or a service / create your own - (EDIT: Don't fall for make money quick or how to make xxxx\$ on marketplace -) most of it (like 95%) is just fake gold.

hope that helps!

quack.

Thank you so much I already looked but how do I know if a seller has a good reputation is it by their flashy stats when I click on their profile or is there something else I can try? also how do I get bytes? I am not tryna spend money on this website rn until I am familiar with it

Credibility is a metric for "contracts" - like ebay. so above 100 positives and relatively low negatives, you should be ok.

bytes is a reward system, you can read about it if you scroll above my post, where i linked [Help Docs](#). you can also buy em on market, in the buy and sell section.

ye, spend some time reading through the forum for a while before spending any.

hope that helped ya.

cheers!
