Thread: [Complete Multi-Vertical Trading, Casino, Sportsbook & Crypto Platform](#)

Remotiq - July 13, 2026, 7:08 pm

For Sale: Complete Multi-Vertical Trading, Casino, Sportsbook & Crypto Platform

I am offering a fully developed, modern, all-in-one platform that combines financial trading, casino gaming, sports betting, prediction markets, contests, VIP rewards, affiliate management, cryptocurrency payments and live customer support within a single ecosystem.

This is not a simple frontend template or a collection of disconnected pages. The platform has been designed as a complete product with a unified user experience, shared wallet structure, user account system, operational modules and administration capabilities.

Core Platform Modules Multi-Asset Trading System

The platform includes a trading module covering:

- Forex currency pairs
- Cryptocurrencies
- Global stocks
- Market indices
- Commodities such as gold and silver
- Custom or synthetic instruments

Users can open time-based or directional positions and monitor their activity directly from the dashboard.

Depending on the selected deployment configuration, the trading system can support:

- Long and short positions
- Configurable leverage
- Take-profit and stop-loss orders
- Real-time profit and loss calculations
- Open and closed position tracking
- Trading history
- Instrument-specific limits
- Minimum and maximum position sizes
- Spread and commission configuration
- Market opening and closing controls
- User-specific trading restrictions
- Integration with external market-data providers

The trading infrastructure can be connected to the buyer's preferred pricing API, liquidity source or market-data service.

Prediction Markets

The platform includes a dedicated prediction-market system for financial, political, sporting and global events.

Administrators can create markets such as:

Will Bitcoin exceed a specified price by a certain date?

Will a particular team win a tournament?

Will a candidate win an election?

Will gold reach a defined price level?

Will a company's stock close above a target price?

Each market can include:

Multiple possible outcomes

Yes-or-no selections

Expiration and settlement dates

Dynamic probability percentages

Minimum and maximum participation amounts

Total market volume

Manual or automated settlement

Cancellation and refund functionality

Complete user participation history

Casino Platform With Approximately 1,000 Games

The casino section is structured to support approximately 1,000 slot and casino games through compatible game-provider or aggregator integrations.

The casino lobby includes:

Provider and category filtering

Featured games

Popular games

Recently added games

Recently played games

Favourite games

Game search

Responsive desktop and mobile interfaces

Real-money and bonus-balance support

Betting and winning history

Provider-level maintenance controls

User or country-based game restrictions

The platform is designed to work with authorised third-party casino providers. The availability and transferability of individual games depend on the relevant provider agreements.

Sportsbook and Live Betting

The sportsbook module supports pre-match and live betting across multiple sports, including:

Football

Basketball

Tennis

Volleyball

Ice hockey
Table tennis
Esports
American football
Baseball
Motorsports
Additional sports supplied by the selected data provider

Available sportsbook functionality includes:

Pre-match betting
Live betting
Single and accumulator bets
Bet-slip management
Live scores
League and event search
Bet history
Winning, losing and pending ticket statuses
Automated event settlement
Refunds for cancelled events
Minimum and maximum stake limits
User-specific betting limits
Market-level risk controls
Configurable maximum winnings
Cash-out-ready architecture

Odds, fixtures, results and live data can be supplied through the buyer's preferred sportsbook API.

Unified Crypto Deposit and Withdrawal System

The platform includes a cryptocurrency payment and wallet structure that can be configured for assets and networks such as:

Bitcoin
Ethereum
USDT on TRC20, ERC20 and BEP20
USDC
BNB
Litecoin
Solana
Additional supported cryptocurrencies

The payment system can provide:

User-specific deposit addresses
QR-code payments
Blockchain confirmation tracking
Minimum deposit limits
Network fees
Automatic or manual deposit crediting
Withdrawal requests
Withdrawal-address validation
Administrative approval

- Transaction-hash records
- Deposit and withdrawal history
- Daily and user-specific withdrawal limits
- Network maintenance controls
- Hot-wallet or external payment-processor integration
- Unified Wallet

Trading, casino, sportsbook, prediction markets and contests can operate through one central user account and wallet.

The unified structure allows users to move between different parts of the platform without maintaining separate accounts or balances for each product.

Contest and Tournament System

Administrators can create timed competitions based on metrics such as:

- Highest trading volume
- Highest net profit
- Largest deposit volume
- Highest casino turnover
- Highest sportsbook turnover
- Most active users
- Best performance on selected instruments
- Highest number of referred users

Each contest can include:

- Start and end dates
- Countdown timers
- Prize pools
- Entry requirements
- Minimum deposit or turnover requirements
- Live leaderboards
- Multiple winners
- Automatic or manual reward distribution
- Custom eligibility rules
- VIP Club and Loyalty Programme

The platform includes a configurable VIP system that rewards users according to their activity.

VIP progression can be calculated using:

- Total deposit amount
- Trading volume
- Casino turnover
- Sportsbook turnover
- Account age
- Active days
- Referral performance
- Manual administrator approval

VIP benefits can include:

- Reduced trading fees
- Higher withdrawal limits
- Priority withdrawals
- Exclusive promotions
- Cashback
- Dedicated account managers
- Access to private contests
- Priority customer support
- Daily, weekly or monthly rewards
- Custom benefits for each VIP level

All VIP levels, requirements and rewards can be configured from the administrative side.

Bonus and Promotion Management

The platform can support multiple promotional models, including:

- Welcome offers
- First-deposit bonuses
- Deposit-matching bonuses
- Cashback
- Loss-back promotions
- Free spins
- Free bets
- Referral rewards
- VIP rewards
- Daily login rewards
- Promotional codes
- Special-event campaigns

Each promotion can include configurable deposit requirements, wagering conditions, maximum rewards, eligible products, expiration dates and user restrictions.

Affiliate and Referral System

The affiliate module can provide:

- Unique referral links and codes
- Registration tracking
- First-deposit tracking
- Referred-user statistics
- Revenue-share commissions
- CPA commissions
- Hybrid commission structures
- Sub-affiliate functionality
- Pending and approved earnings
- Affiliate withdrawal requests
- Daily and monthly performance reports
- Campaign and traffic-source tracking

Commission rates can be configured for individual affiliates, groups or campaigns.

Live Customer Support

The integrated support system allows users to communicate with support representatives directly through the platform.

It can include:

- Real-time messaging
- Online and offline availability
- Support departments
- Conversation history
- Internal support notes
- Chat transfers between agents
- Saved replies
- File and screenshot attachments
- User information displayed to agents
- Offline messages
- Administrative supervision
- External notification integrations
- User Dashboard

The dashboard provides users with immediate access to the most important parts of the platform, including:

- Available balance
- Quick-deposit controls
- Live market prices
- Featured financial instruments
- Breaking and trending prediction markets
- Active contests
- Contest countdowns
- Popular casino games
- Account-verification steps
- Notifications
- VIP information
- Promotions
- Live support
- Language and currency controls

The interface uses a premium dark design with gold and turquoise accents and is responsive across desktop, tablet and mobile devices.

The back office can provide reports covering:

- Registrations
- Active users
- First-time depositors
- Deposits and withdrawals
- Trading volume
- Casino turnover
- Sportsbook turnover
- Bonus costs
- Affiliate performance

VIP activity
Most-played games
Most-traded instruments
User and country performance
Payment-method usage

Reports can be filtered by date, user, country, transaction type and product category.

Security and Compliance-Ready Features

The platform can be configured with:

Email verification
Two-factor authentication
Session and device management
IP tracking
Role-based administrator permissions
Administrator audit logs
Rate limiting
Withdrawal-address verification
Suspicious-login alerts
API authentication
Encrypted sensitive data
Cloudflare integration
KYC and AML provider integrations
Responsible-gaming controls
Deposit, loss and session limits
Self-exclusion functionality
Multi-Language and Multi-Currency Support

The platform is designed for international deployment and can support multiple languages and account currencies.

Languages and currencies can be added according to the buyer's target markets. Branding, logo, colours, terminology and homepage content can also be customised.

The platform is suitable for:

Licensed casino and sportsbook operators
Financial-technology companies
Crypto-focused entertainment platforms
White-label software providers
Existing operators seeking a modern replacement
Agencies serving regulated gaming businesses
Investors looking for an advanced multi-product platform
Important Commercial and Legal Notice

The software itself does not include an operating licence.

The buyer is responsible for obtaining all licences, regulatory approvals in the jurisdictions where the platform will operate.
