hello everyone

I stumbled upon an absolute goldmine today and just had to share it with the community!

If you are looking to grab student discounts, sign up for trials that require an .edu or university email, or just need to bypass verification on various platforms, you need to check this out.

Link: <https://boomlify.com/>

What is Boomlify?

It is a temporary university/college email generator. Instead of jumping through hoops to get a student email, this site gives you a functioning college email address instantly

How to use it:

Head over to Boomlify.com.

Grab your generated university email.

Use it on your target site (for student perks, trials, or social media registration).

Watch the verification emails land instantly in your temporary inbox on Boomlify.

Since it's a temporary mail service, make sure you use it for accounts/trials you don't mind losing access to later on, or use it to quickly grab discount codes!

Enjoy !!!!
