Telegram Mass DM — Managed Outreach Clients Reorder

What we run: Telegram mass dm is the single service most of our clients buy twice — we push your message straight into the inboxes of real, active Telegram users, hand-picked from the groups and channels your future customers already sit in.

Contact To us From TG: YourTGSolutionsContact

How it works: You give us two things — a target and a message. Nothing else. We assemble the audience from your own source groups, then run mass dm telegram delivery only to accounts showing recent activity. No uploads, no dashboards, no warming accounts on your side.

Targeting: Trim the audience before anything sends. Filter by gender, recent activity, whether a profile carries a photo, and Telegram Premium or Boost status. Tighter filters mean fewer wasted messages and replies that come from people who actually match what you sell.

Our system: Underneath sits warmed accounts, rotating proxies, and careful send-pacing. Our telegram mass dm bot manages rotation and rate so each direct message reads as hand-typed, never machine-blasted. Proxies, warming, throttle limits — that entire operational load stays on us, not you.

Price: Larger volume earns a lower per-message rate — that is the whole logic of our telegram mass dm service:

1K DM — \$45

5K DM — \$200

10K DM — \$360

Why we lead with repeat orders: We don't post invented testimonials. The honest metric we watch is reorders — roughly 6 of every 10 campaigns last quarter came from clients running their third or later run. One-time buyers prove little; people who keep funding more targeted DMs are the real review.

FAQ — Are these actually real people? Yes. The audience is built from live groups and screened for recent activity, so your message reaches humans who were online lately — not dormant profiles or bot accounts padding a number.

FAQ — Can you send all 10K in one hour? No, and that's deliberate. We throttle for deliverability, so a large campaign spreads across a few days rather than a single burst — safe beats instant, and your inbox placement is what protects the results.

Reach your audience: Send us your target and message; you'll have a quote the same day.
