Thread: [\[Completely Free\] Full-Stack Development for Your Project](#)

K4RMAf - July 16, 2026, 4:26 am

FULL-STACK SOFTWARE DEVELOPMENT
??
I'LL BUILD YOUR PROJECT FOR FREE
You get a free project. I get a portfolio piece.
??

I recently completed an intensive Full-Stack Software Engineering Bootcamp, before that, I spent several years working as an IT Department Manager and IT Support Specialist. My goal is now to transition into software development as a full-time career. Like many junior developers, I need real-world projects that I can showcase in my portfolio so I can apply and get my first Software Developer position. That's why I'm offering my development services completely FREE OF CHARGE.

? TECH STACK ?????????????????????????????????????
? Whatever your project requires — I'm always willing to learn and use the technologies that best fit your project's needs.

- ? Java
- ? Spring Boot
- ? JavaScript
- ? HTML5 & CSS3
- ? REST APIs
- ? SQL Databases
- ? Git & GitHub

? WHAT I CAN BUILD ?????????????????? ?????????????????
? Business Websites — modern, responsive websites
? Web Applications — complete front-end and back-end development
? Dashboards & Admin Panels — management and reporting tools
? Management Systems — customers, products, bookings, inventory and more
? REST APIs — backend services and integrations
? Automation Tools — simplify repetitive tasks
? Personal or Business Projects — if you have an idea, I'm interested.

? WHAT'S INCLUDED ?????????????????????????????????
? Front-End Design & Development
? Back-End Development
? Database Design
? Responsive Layout
? Clean, organised and commented code
? Documentation (if required)
? Complete source code
? Progress updates throughout development
? Logo design for your business, service or project if you don't already have one

? HOW IT WORKS ??

You tell me what you need.

Whether it's an idea, an existing project, or something you've always wanted to build, I'll work with you to make it happen.

Depending on the project, I can take care of:

- ? Planning
- ? UI / UX Design
- ? Front-End Development
- ? Back-End Development
- ? Database Structure
- ? Logo & Basic Branding
- ? Testing & Deployment Guidance

? THE ONLY THING I ASK ??

Once your project is finished, I'd simply like your permission to include it in my portfolio while searching for my first Software Developer position.

- No payment.
- No hidden fees.
- No catch.

Just a win-win opportunity.
You receive a professionally developed project completely free.
I gain valuable real-world experience and another project to showcase in my portfolio.

??
HAVE AN IDEA? LET'S BUILD IT TOGETHER!

Post on this thread & Send me a private message with your idea or requirements.
No matter how big or small your project is, I'd love to help.

Thank you so much. Since noone ever got in touch with me, I stopped checking in replys, so sorry for the late reply.
Let's make it happen!
