Thread: [Leaked database search](#)

Berzerker - July 19, 2026, 7:36 pm

Anyone know leaked database search engine that is free and still active?

you might get some luck if you search something on telegram with the words intelx but very limited. there is a reason for that not to be free

Leaked API keys you mean? Breach VIP is down now ? so far that one was the good one for recon and lookups.

You have some Telegram bots you can use, such as:

t.me/PasswordSearchBot — it lets you make up to 10 searches per day. You can find passwords that were leaked by typing email.

t.me/PasswordLeakCheckerBot — this provides more than just passwords, but note that its free only for the first week.

I recommend that you first check the email on “Have I Been Pwned.” If it’s associated with any known leaks, then use the bots so you dont waste a search.
