Thread: [BEST MULTI-ACCOUNT TWITTER/X DM SENDER](#)

HASHFARM - July 23, 2026, 2:32 am

Multi-account Twitter/X DM Sender

send messages to a list or followers; supports text, photos, and message threads; SOCKS5, cookies, multi-threading

Twitter DM Sender — Multi-Account Sending To Private Messages X

Software for mass sending Direct Messages through accounts by cookies. Works through a SOCKS5 proxy, supports multiple accounts simultaneously

What it can do

Two mailing scenarios

By list — load recipients (@username or link <https://x.com/>...) and send them messages.

To your followers — each account writes to its followers.

Message types

1)Text only

2)Picture only

3)Text + picture

chain: picture -> text -> picture (3 separate DMs)

Technically

Authorization by cookies from the Cookies folder

SOCKS5 proxy with pre-start verification

Multithread: multiple accounts running in parallel

Customizable pause between messages from the same profile

Real-time log

How Does it Work?

Put cookies in Folder "Cookies/"

Proxy in proxy.txt

Text / Pictures to the required files and folders

Launch GUI -> Choose mode -> Start

The interface is simple: two blocks (list / subscribers), delay, streams, log.

PRICE: \$25
