Thread: [Robinhood memecoin \\$HALT](#)

Gox. - July 24, 2026, 6:52 am

In 2016, Vitalik famously said, during TheDAO hack "Ok guys can you stop trading".

In 2021, Robinhood famously halted \$GME trading during the r/wallstreetbets GME short squeeze

\$HALT on Robinhood was deployed by the same key that deployed the WithdrawDAO contract in 2016 (

<https://etherscan.io/tx/0xfeae1ff3cf9b6927d607744e3883ea105fb16042d4639857d9cfce3eba644286>) - verification sig: <https://etherscan.io/verifySig/320171>

\$HALT is a memecoin playing on the events from 2016 and 2021 that affected retail, deployed by the same key that saved retail during TheDAO.

It has 100% dev buy backs of tokens that get locked (20% locked, 40% Vitalik, 40% to EF) so essentially 100% locked - and anyone can claimFees() and trigger the buy back from the website.

I'm dead ???

All these meme coins are complete scams. I can't believe people make money off them... I've never touched any memes, besides Dogecoin like 13 years ago lmao.
