Thread: [\[BrokenBags.Shop\] Tap Into a lucrative Market | 20% Lifetime BTC Commissions](#)

? HOW OUR TOP EARNER CLEARED \$1,284 IN BTC THIS WEEK ?

Stop grinding one-off dropshipping sales. Tap your network into the ultimate anonymous Telegram source, become the plug, and keep up to 20% in Crypto FOR LIFE.

Let's talk psychology and math for a second.

Why do 99% of affiliate marketers and online hustlers burn out? Because they sell one-off products. You spend hours driving traffic to sell a plastic gadget, you make a \$5 commission, and you never see that customer again.

Now, imagine getting a cut on a premium, consumable product that people actually crave, use daily, and re-order every two weeks.

Welcome to BrokenBags. We are an underground Telegram-based platform acting as the source for super cheap, premium flower, carts, and edibles.

Here is the play: We pay you up to 20% on every single order a customer makes through your referral link... FOR LIFE.

? THE PROOF IS ON THE BOARD

We aren't promising you fake, hypothetical riches. Our affiliates are actively printing money just by linking their groups and friends to our Telegram bot.

Look at our live leaderboard right now:

? *****uce — 31 Referrals — \$1,284.50 EARNED

? *****ney — 18 Referrals — \$742.00 EARNED

? ***ndz — 12 Referrals — \$498.25 EARNED

Do the math on User #1. He made \$1,284.50 from just 31 people. That averages out to \$41.43 per referral.

How is that possible? Because weed is a habit. You don't have to find 1,000 customers. You just need to find 30 smokers who buy their supply every month. You do the work once, you connect them to a cheaper source, and you get a cut of their lifestyle forever.

? WHY OUR SYSTEM CONVERTS (THE CHEAT CODES)

We didn't just build a store. We built a conversion engine. It is psychologically impossible for your network to say no to this setup:

? Forced Urgency (Loss Aversion): Your link automatically gives them \$10 OFF their first

order—but it explicitly expires 48 hours after they open the bot. This forces an impulse buy before they can second-guess.

? The "Trojan Horse" Gifting Loop: Here is a genius trick our top earners use: From your dashboard, you can gift store credit directly to a friend. The exact second they claim that credit, the bot permanently hardcodes them as your referral. You literally hand a buddy \$5 of credit to lock in 20% of their buys for the rest of their life.

? Absolute Risk Reversal: We offer a strict Arrival Guarantee. If a package gets lost, we reship or credit it. Your referrals carry zero risk, destroying any hesitation they have about buying online.

? 100% OPSEC & Anonymity: No credit cards. No banks. No real names required. Checkout is done purely in BTC or ETH via one-time addresses inside the bot. We ship to all 50 states in plain, unbranded, smell-proof packaging.

? CLIMB THE RANKS (GAMIFIED PAYOUTS)

Our tiered system inside the bot is designed to reward real hustlers. You only need ONE referral to level up to Bronze. Cash out directly to your external wallet (BTC/ETH) once you hit \$25, or spend it as store credit with zero minimums.

? Member (0 Refs): 5% Commission

? Bronze (1 Ref): 8% Commission (Literally get one friend to buy and you get a raise!)

? Silver (3 Refs): 10% Commission

? Gold (7 Refs): 13% Commission

? Platinum (15 Refs): 16% Commission

? DIAMOND (30+ Refs): 20% COMMISSION

Hit Diamond with just 30 customers. Once you are there, you keep 20% of every order they place for the rest of their lives.
