Thread: [An online store platform with crypto straight to my wallet?](#)

Basilisk - July 27, 2026, 3:51 am

Hello,

I've been using a single platform as an online store, but sadly they've changed their policy, and now the crypto goes to an external wallet, of which requires KYC.

I'm looking for a service that can be used as an alternative, such as sellix in the good old days that crypto payments can be sent directly to my wallet.

I've tried SellApp but they require some very complicated requirement in order to do.

Any suggestions?

Preferably free, but if it's decent, I'm willing to pay.

You can use WHMCS with crypto gateway addons if you're selling digital products. You might be able to sell physical goods too but not sure

Nowpayments doesnt require KYC for crypto. If you wanted to accept FIAT thru them it requires KYC, but crypto you are good.

Thank you, is there any platform that works well with it?

Yes, I only accept crypto so stripe or anything of the sort just isn't relevant.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
