Thread: [\[CHEAP AI, GPU, CPU COMPUTE\] OVER 50% OFF ON AWS, DIGITALOCEAN, AZURE + MORE!](#)

juulstar - July 28, 2026, 2:31 am

Hello HackForums!

Calling all developers, AI enthusiasts, engineers and nerds -- anyone who needs compute, really! I have a time limited, hyper valuable and extremely well priced offering.

I have been in touch with a few of my friends who own startups, work in tech, etc. A few of them have offered me massive discounted services from many cloud providers, as they regularly get account credit / spend which is bonus, expires, or they are required to spend a certain amount, et al.

If you need or want to purchase time on GPU nodes, CPU nodes, get AI inference (or any of the other services from the cloud providers I have in stock; check them out ??), I am ready to help you SAVE MONEY on EVERYTHING YOU COULD IMAGINE!

YES, these cloud services are procured LEGITIMATELY! Expect your (whitehat only) operations to be running until your term/credit allocation purchased is up.

NOTE: I have given my partners and friends who have offered spend to me some money up front for both DigitalOcean and Azure credit/spend. So, as a test run and to see if this offering would be worth continuing to facilitate and offer, I currently have two popular cloud providers to offer.

OFFERINGS IN STOCK:

[!] PRICING DEPENDS ON WHAT AND/OR HOW MUCH YOU ARE PURCHASING. THE TOTAL RANGE WILL GENERALLY BE ~40-90% OFF. *for this test run, it will average at 50%. if these products sell, then I will lower the price as more stock makes it to me.

MINIMUM PURCHASE MUST EQUATE TO \$250 PAID TO MYSELF (so, if you are getting 50% off of \$500 worth of spend, you'd pay \$250 to me).

1. DigitalOcean (<https://digitalocean.com>)

~\$4,780 of credits ready for purchase (max term ~3mo; use within that time period)

Good For:

- Excellent GPU compute w/ powerful nodes at decent prices -- BIGGEST DRAW! Host AI models for cheap.
- High performance CPU compute and VMs
- Other popular cloud services; see their site

DEAL VALID UNTIL AUG 1ST 2026: Get roughly \$5,000 credits with direct access to DigitalOcean as a subuser on the account for \$1,888 in cryptocurrency.

2. Azure (azure.microsoft.com + "AI Foundry" ai.azure.com)

\$4,850 of credits ready for purchase (purchases are valid for 1yr for this batch of credits)

Good For:

- AI inference: If you'd like to use their AI Foundry as an OpenAI compatible API/inf. provider and

spend the credits on that alone, go for it.

- Various AI/ML based services: Impressive voice transcription (within AI Foundry) all the way to scalable VMs, blob storage and Azure Front Door + DDOS/IP Protection. See their site.
- MANY, MANY SERVICES: Near AWS level... I like Azure Email Service (similar to AWS SES), and their GPU compute services via GPU enabled virtual machines (and their cool "serverless" GPU compute environments -- cool innovation). See their site.

DEAL VALID UNTIL AUG 1ST 2026: Get roughly \$5,000 credits with direct access to Azure as a subuser on the account for \$1,777 in cryptocurrency. Please note that some services may require a request to be approved in order to access it.

OFFERINGS ON THE WAY *(if this service sells well)*:

Google Cloud, AWS, Hetzner, an EXTREMELY CHEAP storage solution (S3 primarily) from a startup which provides unmetered, fair-use egress and has an experimental E2EE mode, as well as some other S3, IPFS or general cloud storage providers.

[READ CAREFULLY] TERMS OF SERVICE & RULES:

- You will not be refunded unless there is an inability to provide the service. Even in this event, refunds and reimbursements come down to my choice. You'll have to trust that I'm reasonable... Which, I will be, granted these terms are followed!
- LEGAL USAGE ONLY. No exceptions, period. If you are found to be violating any laws of relevant jurisdictions by the cloud provider (or, THEIR OWN TOS), or we get any alerts and/or warning of such behavior (and, the allegations prove true), your access to services will be terminated and we will not take further action lightly.
- Payment must be in full, up front. There will be a fee of 7.50-10.00% for purchases made w/ anything which isn't crypto. IBTC, XMR, LTC, SOL are accepted; services are provided after the txid shows that the funds are settled.
- I am happy to use a middleman which we both agree on. You will pay the fee.

- Generally speaking, you will not have full access to the account by which the credits are in, as they are owned by the companies we have reached out to. You MIGHT be able to be made a subuser with access to what you intend to purchase, and with a budget of what you have paid. It depends on the companies we are sourcing from. For larger purchases, if you are okay with access by API (which is our own API that forwards the request to the cloud provider's API if it is whitelisted, and logs it for us) can be provided. [temporary note: the deals in stock currently should be all good to go, this disclaimer is for other cloud providers]

PM ME ON SITE BEFORE STARTING A CONTRACT, AND WE WILL TALK. DYOR; I AM NOT HERE TO INFORM YOU ON THINGS LIKE DIGITALOCEAN VS AWS.

FOR NOW, I WILL FOCUS ON SELLING SERVICES WHICH CAN BE PURCHASED ALL IN ONE SWOOP, INCLUDING THOSE WHICH ARE GENERALLY "ON DEMAND" (there are flash deals to see if anyone would like to nab the entire balance for well over 50% off. Testing the waters!

For our first deal, I will only communicate + deal on site with you, and I will likely refuse any payment which isn't cryptocurrency that cannot be "flushed" (fake transaction generation). I don't really care if you're vouched.

Hit me up anytime. Aside from this, I will likely be returning to sell Claude accounts (and many other things, services, etc) at some unbelievable prices. Keep your eyes open.

Thanks guys. Be safe!

[contract=tid]Start Contract[/contract]

EDIT: AFFILIATE PROGRAM / FINDERS FEE!

I am offering a reward / cut of profits from proceeds to any user who can bring a buyer to me

The current target sale is the deals which you see ending in August. You are welcome to tack on your own markup, i.e. sell the package to the buyer at \$2,000 instead of \$1,888 -- I will let you keep the markup, and still provide a negotiated cut of the profit; be sure to tell me your sale price to the lead before you hand them off to me, and if they cannot pay in crypto, you'd better take their fiat and then give me crypto ;)

Please PM me if interested. Thanks.

Thanks man. If you can find a buyer, I am happy to cut you a finders fee. Same to anyone else.

czby355 - August 16, 2026, 3:22 am

I need bro

OtterLover - August 23, 2026, 11:19 pm

Is it still possible?

MassMax - August 31, 2026, 5:52 am

Sweet Listing. GLWS

juulstar - September 3, 2026, 11:31 pm

Closing for now -- all sold, and reservations completed for an offsite client for most traffic to come (likely for good atm).
