Thread: [Please provide information on all available cryptocurrency money laundering services.](#)

jhonme0611 - July 31, 2026, 7:59 am

Please provide information on all available cryptocurrency money laundering services, such as TornadoCash.

Please list all available services.

Omniscient - July 31, 2026, 8:47 am

There is no such thing as cryptocurrency money laundering services.

Tornadocash was a privacy service. It was used to launder crypto. Any mixer could be used for illicit purposes.

Braco22 - August 8, 2026, 1:42 pm

Lame attempt FBI, go home.

Binance - August 10, 2026, 8:43 am

Unfortunately, because of money laundering, Even simple coinjoins and privacy wallets like Wasabi with AUTOMATIC coinjoin are considered money laundering service in many T1 countries. Accepting a coinjoin wallet transaction to a personal exchange is a big red flag and will likely get police at your door with a search&seizure in current conditions.

Be wary of using some of these services in general.

Froggerini - August 10, 2026, 9:46 am

Reputable P2P guy, exchange it to monero in chunks, done.

Hence why Monero will never get the police involved.

Hey ~ if you have crypto or the money and want to use crypto with 0 trace to clean it and move it text me on telegram : [deleted]

I can cash out daily 50k USDT to 100k Usdt for Cash \$ and send it to you via my exchange network around the globe! for trust u can start small amount and step by step higher amount ! [warn]

bebonzy09 - September 3, 2026, 5:24 pm

Any service in crypto can be used for money laundering lmao. P2P swap sites, instant swap sites, mixers, NFTs.

Common sense really, any financial tool and or service can be used to launder money. All it depends on is if you know how to properly do it.

FYI I don't launder money, but anything that deals in finance can be a tool used to launder, not even just talking about crypto...

You sure about that?

emiratidubai - October 16, 2026, 1:01 am

We can launder assets through Dubai and make that money disappear let's talk.

Any minimum upfront fees ~100 thousand to get started or you can also do increments of 10?

OP, nothing on the clearweb will be fully private and untraceable unless you're willing to take a risk. DeepWeb offers more opportunities for this sort of question.
