Thread: [AP3X X3X - X Automation Panel \[10 Slots\]](#)

Driz - July 31, 2026, 4:26 pm

This has been in the works for a while so may as well start opening up more slots.

Introducing AP3X X3X, a X Automation Panel/Multi Tool for
Mass Managing thousands of accounts across multiple different niches - Mass Set Profile Pictures, Bios, Schedule Tweets with text and image (spoofed to match iOS specs)

Scrape 10000s of target accounts everyday - filtering by country, verification status, DM status including inbuilt LLM intent classification and exposed endpoint details

Starting follow and chat campaigns by the thousands - the current server specs are capable of running 50,000 accounts in one fleet

Multi threaded with dynamic worker allocation - depending on job specs, the server will allocate X amount of workers per account routine

XChat Decryption/Encryption and Setup - The bot is capable of setting up and opting in to XChat DMs, and is currently integrated into Capital AI to generate and initiate chatting for funneling and conversions to your leads for OFM.

+ More.

If you require a specific feature/want to enquire about how a certain feature works, drop me a Chat on HF or a DM.

? loading encrypted image...

Pricing : \$250 for the first 3 customers. 500 after.

ToS

The product is provided as is, we may add/remove features depending on the demands of users

The product is often disabled when new updates are being pushed, this is because it works on decompiled APKs, IPAs and undocumented endpoints

There are no refunds for the product - if you wish to cancel subscription, you will retain access to the product till the end of the term

Any attempt to crack or reverse engineer the product or share the product keys with multiple users will lead to a ban

Server performance may vary depending on the loads by the server at any given time - a lot of time and testing has been put into ensuring it performs well under load, however, issues may arise, downtimes may ensue.

You WILL lose accounts when you use this, this is part of the game. The bot has multiple systems in place to ensure you do not hit rate limit errors and such, but botting is never foolproof.

In the future I may add a marketplace to bulk purchase accounts for data purposes.

No Reselling of license. If found = banned with no refunds.

If you have a major operation and require more server capacity/space, I will be able to provide you sharded servers to balance loads.

Stanley - September 5, 2026, 3:24 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
