Thread: [AP3X GrindHub - Grindr API Panel](#)

Driz - July 31, 2026, 4:37 pm

Also been in the works since April, and have had multiple iterations go through it before settling on this stable, but slightly feature stripped version.

Feature Set includes

Bulk Import 1000s of Grindr Accounts either created on iPhones, Android or Emulator into the panel

Set locations, proxies, bios, profile pictures all from one panel -> Group accounts under different personas to manage multiple models

Send openers, replies, tap backs, likes and matches.

Track account stats in realtime - WIP as multiple different formats are incorporated

Resolve HTTP/SOCKS5 proxies to respective profiles and set locations based on proxy location

Account ID Dedup - All automation (Messaging, Tap Backs, Views) are not shared between accounts in fleet. Each account only actions against unique ids.

? loading encrypted image...

Price : \$500 p/m.

Planned Updates :

[*] Capital AI integration for straight funneling into OF/Fanvue/Stacked.

[*] Consolidated chat panels with per chat automation disabling -> allowing for manual VA takeover.

[*] Account Creation via SMS -> We currently already have a working solution with Google V2 accounts, however, SMS creation is still being investigated once attestation and integrity checks are solved.

ToS

The product is provided as is, we may add/remove features depending on the demands of users
The product is often disabled when new updates are being pushed, this is because it works on decompiled APKs and undocumented/private endpoints.

There are no refunds for the product - if you wish to cancel subscription, you will retain access to the product till the end of the term

The server at any given time - a lot of time and testing has been put into ensuring it performs well under load, however, issues may arise, downtimes may ensue.

Accounts will get banned once you spam messaging -> the tool provides enough freedom to ensure how you do your funneling.

In the future I may add a marketplace to bulk purchase accounts for data purposes.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
