Thread: [Selling method for generating daily 50-100/day at least](#)

Docker - August 1, 2026, 3:49 pm

Most "make money betting" threads here are tipster spam dressed up as insight. This isn't that.

What I provide is a method that doesn't depend on picking winners at all. The outcome of the match is almost irrelevant to whether you profit. It's a numbers-based approach that exploits pricing gaps between platforms, not predictive skill. I've been running it consistently for a while now and results are consistent.

What you'll need before reaching out:

A starting bankroll, realistically €100–300+ to make the returns worthwhile but you can start with whatever you're comfortable with.

Willingness to open and verify accounts on several different betting platforms (this only works with multiple active accounts, not one).

Prior betting experience.

What you won't need:

Tipster picks, "insider info" or predictions of any kind.

A big bankroll to start seeing results.

I will offer support for any inquiries that may come up. Feel free to contact me for any further questions on telegram: @haney_do

Price is 150\$, middleman always accepted.

You're buying something where you can make the money you paid back within the 1st day potentially. Price may increase in the future so buy while it's early.

I'm keeping it straight to the point no need for fancy threads that give false hopes.

People just google arbitrage betting. Sick of these BS methods on here .

dfuid17 - August 1, 2026, 6:22 pm

Sounds like betting arbitrage, which is nothing new. Most of these platforms will ban your account for it, and since most require KYC, you're kind of screwed in the medium/long term. You could try P2P sites instead, but those tend to be much more efficient, so arbitrage opportunities are much harder to come by.

You're calling BS something I can prove is generating the money I mentioned without even knowing the setup or anything. If u can do it yourself go ahead and do it. If I'm charging for it , it means it's working my way.

This is exactly why I'm charging for it and don't just offer it for free. I found a way to make it work and generate consistent money.

OP maybe you should've been more specific about why your arbitrage technique is better than the one which has been around since before you were born

I can't go into more detail without revealing the method and the setup. It's been working for me and has been tested over a half year period of daily profit and that's why I'm offering it as a paid service at this point. If you think you are able to reproduce that be my guest.

Hi. Are you willing to accept an MM until you make the first \$200? Thanks

Docker - August 3, 2026, 12:12 am

(Aug 2, 2026 05:46 PM)Fresco Wrote: [\[CITE\]](#) Hi. Are you willing to accept an MM until you make the first \$200? Thanks

I can accept the MM holding the money but only for your 1st payout since this is the same process and how fast you make your money depends on your capital. So once you successfully make your first money you'll be confident enough to make the rest.

100\$+ today just from prematch bets. This is printing consistently, feel free to message for any inquiries.

Anchosteam - August 3, 2026, 3:16 pm

Am I able to do this myself or do I need to send you the money to invest for me. I don't want have to go through you.

Also...what's the limit on earnings?

This is entirely you doing it, I dont participate in any activity. There is no limit in earnings. The more time you have the more you can keep earning every day, that's why I mention 50-100+ in the post title. I consider 50 being the autopilot mode without you wasting much time.

Ok.

How long would it take until getting banned from the sportsbook we are betting on? Thanks

I haven't been banned in my half year journey with the setup im running but even if you do you would have made the money back for sure plus even more.

Any bookmaker should be fine if it's even a bit well known locally or globally.

There are several EV+ and one-click bet arbitrage tools online that are more affordable than the \$150 price tag you put on yours. What makes your service superior to theirs?

Because I offer a setup where you can get value of more than the 2-3% being offered by those sites. You can even find 20%+ offers this way

Docker - August 15, 2026, 11:09 am

Still earning 50-100\$+ on this with less than 30minutes of involvement daily without account risks. I will be selling a limited amount of copies from now on.

is these opportunity comes daily? won't be this get patched or something, waiting for review and will this work worldwide? as not all bookies work worldwide .

Yes the opportunities come daily and it cant be patched , only danger is the account getting limited in the bookie but you can bypass that to an extended degree. Yes this works worldwide as long as betting is legal in your country. Message on telegram for any questions.

How much of a bankroll is needed to hit between \$80-\$100 a day? And can this be scaled? Thanks

You can hit that with 200\$ bankroll easily on a busy match day

Is this live or on pre-game odds ?

Both, you can choose either. Live odds have 99% way higher max bets though.

Fallouts_Death - August 27, 2026, 10:39 pm

Have reached out to Docker asking plenty of questions which he was happy to answer. He also provided me with example matches, main issue I foresee is account-bans given the nature of arbitrage.

Aiming to be starting the method this weekend, sounds promising, will provide an update with how it goes.

Fallouts_Death - August 30, 2026, 6:16 am

Paid off the method already, haven't been limited by any bookies yet.

Anyone looking for a little extra side \$ I'd recommend this method, note that it does take time to setup and it isn't a clear-cut "here's a how-to" method, you are more paying for a mentorship.

Once learned can easily achieve the \$50-100 if you have a good bankroll.

What are the chances of losing our investment?

You cant lose your investment, you bet on both sides and always profit no matter what.
