Thread: [IdleMU RPG New Idle MUStyle Game \(Browser + Android\) Custom Systems & Fair Progr](#)

DevPit - August 2, 2026, 5:21 am

Hey everyone,

I've been working on a small side project over the past months and wanted to share it here in case anyone enjoys MU-style idle games. It's called IdleMU RPG, inspired by Miracle Idle MU - Fork of Immortal Legends.

The game is available as both a browser version and an Android app, so you can play however you prefer. I tried to keep the classic MU idle feeling while adding some modern QoL features so you don't have to babysit the game all day.

Features:

- MU-style idle gameplay with custom systems
- Private-server feeling but without pay-to-win
- Custom items, drop tables, and progression
- Daily rewards & fair leveling curve
- Browser version -> instant play
- Android version -> lightweight, no ads
- No forced shop, no aggressive monetization

Why I'm posting this:

I've played a lot of MU idle games myself and always wanted something that feels familiar but isn't overloaded with paywalls. So I built my own version and figured some of you might enjoy testing it or giving feedback. Any suggestions or bug reports are welcome — I update the game regularly.
