Thread: [Post requirement bug or feature in Convo?](#)

xoxo - August 2, 2026, 7:15 am

So texting works fine without image:

? loading encrypted image...

But when trying to drop/paste a image:

? loading encrypted image...

Is this a bug or feature? Do you unlock sending images with 1 post or was it meant for both images and text?

Either way, this is my first post ;)

Originally we had a 10 post requirement to text in public convo, shouldnt it be the same with pictures ? I dont know if private convo has a 1 post requirement.

But since this is your first post, hello and welcome to the hackforums, please take your time to read into the [Help Docs](#) and get familiar with the rules :) I would love to see an introduction post in The Lounge aswell!

Either way, this is my first post ;)Hm...I have to look at the code because I think the logic forks if it's an image and I may not have changed the post number requirement.

Thank you for reporting.
