If you feel you are getting addicted, you should better stop. Things go out of control really fast.

Break it and come play me 1 vs 1 in poker. atleast you have a mathematical chance to win.

Oof, I always say first few times you better lose. Or it's a slippery slope

What else are you addicted to? Try stacking your addictions to dopaminemaxx. Maybe start drinking / smoking while you gamble?

Hopefully you either called it quits or if you continued to play slots, you're somehow still in profit. I know exactly what you mean though with the feeling they provide and especially if you get a super bonus for instance lol.
