Do I count as gang? It's been forever :eyes: I still have marketable skills! If only people would stop relying on AI 24/7

Bring it back! Bring the internet back! Preserve the spirit of the early net! I thought everyone moving to four apps was terrible, AI agents are making the internet even more fucked. I hope this forum can be a nature reserve where we can all hide from the impending AI slop wave going over all the rest of the internet. Also little communities like hackforums are just fun and wholesome right? Even the beefs and battles, it gives life it's spark. There is a serious push to make this forum active again, and I am happy to see you joining me on this mission.
