Thread: [\[Spook api \] Claude Up To 98% OFF | Fable 5 | Opus 5 | Kimi K3 | CRYPTO INSTANT](#)

Spook api - August 5, 2026, 9:27 am

[NEW] Released KIMI K3 & GPT 5.6 SOL - 20+ Models available now

? Up To 98% cheaper than buying direct from Anthropic same Claude Opus 4.8, Sonnet 5, Haiku 4.5, Fable 5, Opus 5, a fraction of the price ?

? One drop-in API key swap your base URL and go. OpenAI-compatible + Anthropic-native, works in Cursor, Cline, Aider, Claude Code and your own apps.

? Instant delivery key provisioned automatically the moment payment confirms. No waiting, no tickets.

? Pay with crypto, no KYC — BTC, USDT, LTC and more. Anonymous, no subscription, no lock-in.

? Prepaid token packs buy what you need, top up anytime. Credits don't vanish on you.

? Every frontier model, one gateway Claude, GPT, Gemini, Grok, Perplexity and more behind a single key.

? Try before you commit trial packs available. See the savings on your own workload first.

Apologies, I will delete them.

Ethical Vox - August 5, 2026, 12:35 pm

This looks cool. Can anyone vouch for this? Unless OP provides a vouch account?

Yeah I got you with a vouch copy, send me a message

N604 - August 5, 2026, 12:57 pm

Nice website, and if it's legit that's definitely a very good pricing!
Good luck with sales!

JDAM - August 5, 2026, 2:11 pm

My only concerns are cache write being 1.5x pricing and cache read being only a 66% discount. Are we looking at a 5m or 1h cache TTL?

Otherwise, I'm glad you're honest about offering Kiro-sourced usage as an option. Looks solid.

etanemzz123 - August 8, 2026, 1:38 am

Discord and telegram links doesn't seem to work on the website

Hackfourms rules state it isn't allowed so I had to disable it

Tremorz - August 9, 2026, 9:28 am

I am interested in this. Will shoot PM.

Wispr - August 9, 2026, 12:14 pm

Interested in this, I was thinking about buying this instead of OpenRouter, but I also need some uncensored models.

OtterLover - August 17, 2026, 9:48 pm

I've tried several things, but the uptime wasn't good. It was good only in the early stages of operation, and gradually the uptime got worse. By model. Does your uptime stay consistent by model?

MassMax - August 31, 2026, 6:00 am

I am a SaaS founder. Would love to get your contacts. Thanks

NewGeek - August 31, 2026, 3:29 pm

Has anyone used this so far? Looks interesting!

trindotlol - September 8, 2026, 9:19 am

Is GPT 6 / Astra available in this?

I N C R E D I B L E - September 8, 2026, 9:52 am

Every such website claiming to offer such heavily discounted pricing is doing prompt injections and model mixing.

I lost \$2k trying to buy discounted Opus 5. Not even a single one of them will offer a direct/clean API without injections.

This is what inspection revealed.

Code Economics: For some Sonnet queries, they are adding charges for hidden cached context. A short query incurred charges for 10 input + 287 cache-write + 3809 cache-read tokens three times; the actual cost was \$0.002264 instead of the expected \$0.000045—roughly 50 times more expensive. The tested Opus query did not trigger caching, and the charge matched standard rates. Caching is not applied to all queries but depends on the query type.

Conclusion: Text, tools, images, and long-context capabilities are functional. The main risks are the unconfirmed fingerprint and Sonnet's unpredictable costs due to paid hidden caching.

Before actually buying, test out their API with the inspection tools and script. Good luck
