Interesting thing to give away.

Random question - why am I getting rate limited on the request? I wanted to fart around with some decomp stuff :(

Thanks for the tokens though.

Thanks for the tokens though.

I added a rate limit on giveaway keys so everyone can get a chance to test it

Question: do you store prompts sent through the platform?

Thinking about some work stuff, but might look into a cheap rate to try RE some game stuff. I've done a bit manually but can't be bothered going on from here
