? Features ?

What makes Violet special

Device Control

VNC

Real-time desktop screen control with the ability to control the keyboard and the mouse, you'll see what your target is doing and also control his system.

HVNC

The hvnc gives you the ability to control the desktop like opening browsers, file manager, cmd, powershell, etc. without the victim noticing, so it's like the vnc but more stealthy.

CMD & File Manager

A remote command control is capable of controlling the whole system using the system commands remotely, and remote file manager to control the PC's files like download, upload, run files, encrypt,

decrypt, etc.

Microphone, Sys Sounds and Camera Manager

Gain access to the PC microphone to hear any ambient sounds around the target's device. System Sounds let you capture all internal audio like videos, calls, Zoom meetings, and more. The Camera Manager allows full webcam control to record, snap photos, and watch the victim live in real time.

Location Manager

Location Manager lets you track the target's real-time location using GPS or Wi-Fi data. View movement history and get accurate coordinates to monitor their location at any time.

Clipboard & Process Manager

Clipboard Manager lets you view everything the target copies and even modify it in real time. Process Manager gives you full control over running processes view, start, stop, or kill any task on the target's system.

System Control

File Executor

File Executor allows you to run files from the disk, directly in memory, via URLs, or even execute raw opcodes for shellcode. Perfect for stealthy and flexible payload deployment.

Power Manager

Power Manager gives you full control over the target device—put it to sleep, shut it down, restart, or log off the user with a single click.

Utilities Manager

Disable key system utilities like Task Manager, Regedit, and the firewall. You can also block system updates to maintain full, uninterrupted access.

Anti Resetting & Updating

Disables Windows system reset functionality and blocks Windows Update services to prevent recovery and system patching.

SysKiller & BSOD Absorber

System Killer corrupts the BIOS and destroys core kernel components, leaving the system in a critical, unrecoverable state. BSOD Absorber triggers a Blue Screen of Death, force-crashing the system instantly.

Active Windows Manager & Message Box showing

Active Windows Manager lets you monitor and control open windows on the target device. You can display custom message boxes as well.

Change Wallpaper & Installed Programs Manager

Wallpaper Manager allows you to change the target's desktop background remotely. Installed Programs Manager lets you view, uninstall, or manipulate software installed on the system with ease.

Tools

Blank Screen

It blocks the screen for the victim and also blocks the keyboard and the mouse while you have a full control over it.

Clipper

The Clipper monitors the clipboard for cryptocurrency addresses and automatically replaces them with the attacker address, ensuring any transaction is redirected without the target noticing.

Offline/Online Keylogger

The offline/online Keylogger gives you ability to see every thing the victim wrote using it's keyboard also it shows you were did the victim write it, as an example let's say the victim tried to login in Facebook, it'll show you that those words the victim wrote (the user and pass) got written on Facebook login page.

Stealer

Extracts saved logins including usernames, passwords, and emails. It also grabs the Windows activation key, Wi-Fi passwords, email credentials, system tokens (like Discord), and more sensitive data stored on the system.

Grabber

Extracts the data directories from messaging apps like Telegram and WhatsApp, as well as from cryptocurrency wallet applications and browser-based crypto wallet extensions.

Fun

Do a lot of crazy stuff to the machine like turn off/on taskbar, turn off/on desktop icons, turn off/on clock, turn off/on notifications, mouse swap left to right and top to bottom, Text to speech that makes you able to let the PC talk to the victim with voice.

Chat

Chat allows you to open a direct communication channel between you and the victim. Send and receive messages in real time, creating an interactive session directly on their device and they can't stop it until you close it yourself.

Script Runner

Can run any type of scripts like bat, ps1, vbs, js, hta, etc. on the target machine.

Defender Manipulation

UAC Manager

the UAC manager is able to turn the UAC off or on inside the machine so if you turned the UAC off, you can run any file as administrator without asking the user himself.

UAC Bypass

The UAC Bypass helps you in rerunning your payload with administrator privileges using windows vulnerabilities like Cmstp, Computerdefaults, DismCore, etc.

UAC Bombing

It repeatedly triggers the UAC prompt in a loop, causing it to appear continuously until the user

eventually clicks Yes.

Defender Killer

Simply it kills the windows defender making it impossible for your payload to get detected in runtime, and this process is irreversible so if you killed the defender there is no way to get it working back even with restarting the machine.

Network Manipulation

DDOS Attack

You can do a ddos attack on any network with any port using your victims as a botnet.

Connections Manager

The connections manager gives you access on all the connections on your victim's PC, like all programs/services that are using the internet and helps you spying on them or even kill/block them.

NetDiscover

NetDiscover scans the whole network (LAN) of your victim and shows you all devices within the same network as your victim, also it give you the main gateway of the network (Router) and all devices Mac addressees.

Network Jammer

Network Jammer lets you disrupt internet access for any device on the same local network as the victim. The victim's device acts as the base for launching targeted LAN-based denial attacks, effectively cutting off selected devices from the internet.

? Built-In Tools ?

Everything included, nothing extra needed

Extension Spoofer

Extension Spoofer disguises executable files to appear as PDFs, JPGs, MP4s, or any other file type. This helps in tricking targets during social engineering attacks by hiding the true nature of the file.

Protector

The Protector encrypts your payload to make reverse engineering and analysis difficult. It's designed to preventing them from extracting valuable information or understanding the payload's behavior.

? FAQ ?

Frequently Asked Questions

Are there any tutorials on how to use?

First of, the rat is very user-friendly and easy to use but also there are available tutorials on how to use it and also some cool stuff you can do with it.

Is there a customer support?

Yes there's a customer support team available 24/7 and ready to help whenever you need.

How to buy it?

You can get it via the main website: violetsoftware.net.

Also you can buy it here via the forum.

[contract=tid]Start Contract[/contract]

byp4ssed - August 8, 2026, 7:55 am

I purchased the RAT from him.

The support for help to setup it perfect - was PERFECT.

Very friendly user and fast replies.

To the rat:

Its the best RAT I ever got.

Its undetected and the functions works perfect.

The crypter you get with it also very good.

Working well!

12/10 - you got a new backcoming customer

+++++

Orukemer - August 8, 2026, 8:13 am

This is the best Rat have come across on the market the admin was so helpful in guiding me on how to use the rat properly and get the needed results I'll give this software 1000 Ratings if is possible thanks for making an magnificent Rat as Violet

trojanpapi - August 8, 2026, 8:16 am

best of the best Violet

MoneyTrain1z - August 8, 2026, 8:34 am

Friendly staff and great experience,highly recommend thank you.

CL1B - August 8, 2026, 2:19 pm

Welcome back! GLWS

nope

Sticky Bot - August 10, 2026, 10:00 pm

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Sep 7, 2026. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

Frost Crypt - August 11, 2026, 7:33 am

very good rat, the seller knows what he's doing so it won't trigger wd on runtime like other rats, it works perfectly fine with my crypter , check them out <https://streamable.com/vqk8yb>

n0xi0s - August 11, 2026, 3:02 pm

im glad u liked the tool buddy dm me to add u in the vip group

(Aug 18, 2026 02:04 AM)wilsmith205291 Wrote: [\[CITE\]](#) Very good product and seller knows what
hes doing . I can vouch for it.

much appreciate or words + check dm for the vip

n0xi0s - August 19, 2026, 6:53 am

(Aug 18, 2026 07:22 PM)abeasinf Wrote: [\[CITE\]](#) This is the best RAT I've ever come across; it's
super easy to crypt. It has a Pastebin option, so if you lose access to your RDP, you just need to
update the Pastebin with your new IP—that way, you don't lose your results. On top of that, you get
personalized support, and the community is very active and always willing to help. Violet RAT came
along when I needed it most and has been a huge help with my work.
thank you buddy much appreciate

Rechnermai - August 19, 2026, 7:36 am

Stealer & HVNC working with the new chrome update?

n0xi0s - August 19, 2026, 7:56 am

(Aug 19, 2026 07:36 AM)Rechnermai Wrote: [\[CITE\]](#) Stealer & HVNC working with the new chrome
update?
yeah ABE bypassed

DramaKing - August 24, 2026, 6:36 am

Is the HVNC currently working?

smart101 - August 24, 2026, 6:41 am

I checked your features and they look promising but which crypter is more compatible?

n0xi0s - August 24, 2026, 8:20 am

(Aug 24, 2026 06:36 AM)DramaKing Wrote: [\[CITE\]](#) Is the HVNC currently working?
yeah

(Aug 24, 2026 06:41 AM)smart101 Wrote: [\[CITE\]](#) I checked your features and they look promising
but which crypter is more compatible?

any good crypter would work but i advise u to use frost crypter also never use an AI slop crypter
they're shit

x64assembler - August 25, 2026, 9:17 am

Is it .NET?

n0xi0s - August 25, 2026, 5:35 pm

(Aug 25, 2026 09:17 AM)x64assembler Wrote: [\[CITE\]](#) Is it .NET?
yes

Sticky Bot - September 15, 2026, 2:00 pm
