Thread: [Full Stack Dev \[Equity %\] \[Partnership\]](#)

Mr.Peanut - August 9, 2026, 2:31 am

Looking for a full-stack dev who's looking to join something promising. Additional Details:

- Dev scope of work is small -> Looking to trade dev work for %
- Project is IRL/Local Business focused
- Project has a residual model, very low entry for target customers
- Project team size (offline) is currently 3-4
- Project would not require any additional work once launched
- Very strong tenure/exp in the field this project revolves in

Willing to pay for dev work in the event of the project failing. Worst case, will end up outsourcing this if needed.

Chroem - August 9, 2026, 2:43 am

I can do this!
