Thread: [RAT Spreading Method / How would you get traffic to a .png URL? \[BTC\]](#)

Anonymous OP - August 9, 2026, 9:43 am

I'm looking for "blackhat" / security research methods on spreading malware.

Here's the thing;

I have the BEST* RAT that I've ever known! It's features are supreme, and it is perfect. I coded it with AI.

I also have a Win+R Cloudflare domain that can produce .png URL's, tricking them to execute a command.

However; despite the page itself, malware, and command being undetected; I can't seem to generate traffic to my .png /imgbb URL.

How can you get traffic to a .png link? That looks like a imgbb URL? My page also works/targets mobile devices. It's dope. But I can't get traffic.

I've had no luck setting up a g ads account, and I really feel like they will reject my ads. Manual posting/commenting/chatting/sharing/linking? WHERE!? AND HOW!?

I will pay you in BTC if you can answer this, or any actual-useful/valuable information. ?

The answer to what youre asking is pretty complex, I would go watch Alex Hormozi in art of marketing in general

Because it seems you have the technical in hand you just need to SELL basicly...the method i would say is quantity over quality works better today, but in the end its about marketing and not asking, but selling and convincing, just like sleeping, act and pretend, and it will happen

BurgerDiplomatSki - August 10, 2026, 2:25 am

I can help you spread it, I'll focus on traffic for you

It's truly the best RAT I've ever known!

God may not be the intelligence behind it; but the Devil must serve me. The human Devil is a weak fool to me, and has no power over Me. I am an Alien; but your Lord Jesus Christ has protected me in this world.

Indeed; AI has been actually-good to Me, but indeed; I am yet to make any profit.

I hope that this will change soon. God has blessed me; but indeed, despite God blessing me; it has only cursed most humans, whom were unaware of God, and cannot rid themselves of their fowl hearts/demons; since the Devil was controlling them their entire lives; they fail to want to agree with Truth, that I am blessed, and indeed; above AI, and all of it's developers.

Yes; I am potentially the future of assistance; but strictly based on actual-intelligence, that currently; the system/rich/gay/famous/royal cannot allow you to know.

Hallelujah!

He coded it with AI and it is the best in the world. And he is an Alien; but your Lord Jesus Christ has protected him in this world.

Yeah not sure how long this account will last. Probably not that long but apart from the crazy I'm not sure there's anything bannable yet.....
