Thread: [\[DarkCore RAT\]-\[Native C++\] hVNC/hRDP/Stealth/Clipper/Stealer/TOR Mode](#)

DarkCore - August 10, 2026, 8:19 pm

Quote:DarkCore

DarkCore is aimed to be one of the few higher end & accessible remote administration tools currently available in the open market. Built from the ground up with security and stealth as its core principles. Designed for operators who demand maximum security without sacrificing performance..

Current Version 2.0.1

Language Support: [English][French][Chinese][Russian][Spanish]

Want to see it in action? Remote Desktop + HVNC

[Video: <https://vimeo.com/manage/videos/1219779155>]

Core Features

- [+] Native compiled binary (no runtime dependencies)
- [+] Hardened binary
- [+] End-to-end encrypted communications with mutual authentication
- [+] 19 on-demand modules (in-memory only, nothing dropped to disk)
- [+] Modular architecture (activate only what the operation requires)
- [+] Multi-client management panel with live session overview
- [+] Multi-language operator UI (EN / ES / FR / RU / ZH)
- [+] CDN / TOR Network / TCP encrypted
- [+] Automatic session recovery across network drops
- [+] Full Unicode support (all countries)
- [+] Minimal system footprint

Remote Control

- [+] Hidden Virtual Desktop (created from scratch)
- [+] Remote Desktop (Adaptive to network latency)
- [+] File Manager (browse, transfer, execute, manage)
- [+] Task Manager (live process control)
- [+] Keylogger (window-aware, offline buffering)
- [+] Webcam capture
- [+] System audio capture (live stream)
- [+] Microphone capture (live stream)
- [+] Clipboard clipper (all major coins supported)
- [+] Registry editor (all hives and value types)
- [+] Startup manager
- [+] Reverse proxy (SOCKS5 exit nodes)
- [+] Interactive reverse shell
- [+] Screenshot capture
- [+] Power controls (shutdown, restart, standby, and more)
- [+] Installed software enumeration

[+] Live active window title on client list

Automation

- [+] Auto Tasks (run on connect, schedule, interval, or demand)
- [+] Mass update (deploy new stub fleet-wide)
- [+] Client targeting filters (admins / non-admins / exclude list)
- [+] Drag-to-reorder task list with live hit / success stats

Advanced Persistence

- [+] Multi-vector mutual-reinforcement persistence
- [+] Registry-based autorun (multiple locations, randomized per build)
- [+] Scheduled task (randomized per build)
- [+] Stealth Watchdog (automatic restart on termination)

Evasion

- [+] Event tracing bypass
- [+] Antimalware interface bypass
- [+] Security tool hook removal
- [+] Indirect / kernel-direct execution path
- [+] In-memory artifact erasure
- [+] Trusted process hosting / stealth injection
- [+] Anti-VM (multi-layer)
- [+] Anti-sandbox (multi-layer)
- [+] Anti-debug (multi-layer)
- [+] Per-build metamorphic mutation

Privilege Escalation

- [+] In-process elevation (no session interruption)
- [+] Automatic elevation on standard admin accounts
- [+] SYSTEM-level access on demand

Intelligence Gathering

- [+] Full system profile
- [+] Process list with resource usage
- [+] Browser credentials and session cookies (all major browsers, modern encryption)
- [+] Browser history with local timestamps
- [+] Saved form and autofill data
- [+] Cryptocurrency wallet extraction
- [+] Communication platform tokens
- [+] Gaming platform credentials
- [+] Email client credentials
- [+] FTP / RDP / VPN credential stores
- [+] Cryptocurrency address hijacker
- [+] Live active window monitoring
- [+] File search and targeted exfiltration

Competing Software Removal

- [+] Aggressive/Passive Bot killer scan and clean
- [+] Whitelist / protect own persistence

Anti-Forensics

- [+] Multi-subsystem evidence wiper (per-subsystem selection)

Security Features

- [+] Per-operator / per-machine module encryption
- [+] Fully reflective loading
- [+] All traffic authenticated and encrypted
- [+] Unique binary pattern per build

Builder

- [+] Per-feature evasion toggles
- [+] Stealth injection vs standalone deployment
- [+] Tor hidden service build path
- [+] Custom icon and assembly metadata per build
- [+] Randomized process name and mutex per build
- [+] Campaign / tag tracking

File Encryption Module

- [+] Multiple encryption modes
- [+] Parallel encryption engine
- [+] Per-victim decryptor generation
- [+] Per-file decryption on demand
- [+] Real-time progress reporting to operator
- [+] Keys held server-side only

Technical Specifications

- [+] Compact native stub (C++) - 470 Kb
- [+] x64
- [+] Full Unicode support
- [+] Supports Tor hidden service
- [+] Encrypted WebSocket Support
- [+] All modules in-memory
- [+] Modules delivered on demand
- [+] All C2 traffic end-to-end encrypted and authenticated

Customizable Background.

Crypto payments accepted.

TOS:

1. No sharing license.
2. No attempting to tamper the software, instant ban.
3. This is a sales thread, if you require any support please use the contact methods.
4. You are responsible in how you utilize this software.
5. All sales are final.

[+] GeoFence prevention - You will not be able to execute the client/stub in the following regions: (RU,BY, KZ, UZ).

Vouches:

(Sep 4, 2026 10:17 AM)scaryforum2 Wrote: [\[CITE\]](#) +Rep, bought and was super fast delivery. Shit is super clean with good documentation

(Sep 6, 2026 11:18 AM)Tobey1337 Wrote: [\[CITE\]](#) Fast delivery, and superb support. Extremely good product.

(Sep 2, 2026 08:58 PM)JollyFraud Wrote: [\[CITE\]](#) Great sir, perfect service with support at every step of the installation or for any questions, he was very helpful like a true gentleman. PERFECT!!!

(Sep 11, 2026 02:54 PM)Magni Tech Wrote: [\[CITE\]](#) Hi everyone! First, thanks a lot to DarkCore for the support with everything.

All I can say is that this product is of the highest quality—everything works very well.

HVNC: This impressed me. I didn't expect it to work so perfectly. Even when we encountered a client with a different resolution setting, the HVNC adapted automatically. Most browsers work fine; I didn't test them all, but Chrome, Edge, and Firefox work correctly.

DarkCore Browser: Another thing I haven't seen before is the DarkCore browser. I really like this feature, especially the side panel that makes everything so easy to work with it.

Password Recovery: Flawless—nothing negative to say about it.

Wallet Recovery: Works very well. It is powered by wallet cracking with extracted passwords, or you can add your own wordlist

? loading encrypted image...

All the other features work great as well.

client managment and designe : perefect

Big vouch to DarkCore for this product! i think these prodect well the first in the market

[+] 1 MONTH: \$150

[+] 3 MONTHS: \$350 (-22% cheaper than monthly)

[+] 1 YEAR: \$1,000 (-44% cheaper than monthly)

FAQ:

1. Why this pricing?

- Just like any service, this is the initial launch price.

2. Can you add DDOS modules?

- No, we will not add this.

3. What crypter is this compatible with?

- Most, this is written in C++ and is native, any x64 compatible crypter.

Middleman/escrow are welcome at your expense.

4chan.org/b/ - August 11, 2026, 12:31 pm

Is there any latency using TOR?

DeathPenalty666 - August 11, 2026, 12:47 pm

(Aug 11, 2026 12:31 PM)4chan.org/b/ Wrote: [\[CITE\]](#) Is there any latency using TOR?

For sure over TOR it will be slower than over http!!!

Transporter007 - August 11, 2026, 2:57 pm

so its fud excluding the eset ?

DarkCore - August 11, 2026, 3:02 pm

(Aug 11, 2026 12:31 PM)4chan.org/b/ Wrote: [\[CITE\]](#) Is there any latency using TOR?

There is expected latency, most modules are adapted to the type of stub being utilized, whether encrypted websockets/TOR/TCP.

(Aug 11, 2026 02:57 PM)Transporter007 Wrote: [\[CITE\]](#) so its fud excluding the eset ?

Currently it is, we will only re-FUD against defender, its expected customers utilize a crypter.

Astraviruzz - August 15, 2026, 4:58 am

Hello, I'm interested in your product. Can I get a copy of the voucher?

DarkCore - August 15, 2026, 8:56 pm

(Aug 15, 2026 04:58 AM)Astraviruzz Wrote: [\[CITE\]](#) Hello, I'm interested in your product. Can I get a copy of the voucher?

Vouch copies only available to selected members. For those interested, post in the thread you must have some sort of contribution to the forum or good reputation.

DarkCore - August 18, 2026, 10:50 am

Demo video added:

[Video: <https://vimeo.com/manage/videos/1219300214>]

Updates 8/12/2026 - 8/18/2026

HVNC

Native Explorer folder open (stable)

- Added Larger browser list (Opera, GX, Vivaldi, DuckDuckGo, Firefox, etc.)
- Steal Session uses real last-used profile
- Telegram & Discord Messengers added.
- Mail clients (e.g. eM Client & Outlook) added.
- Better high-latency streaming

Threat Intelligence

- Gold-only results (less junk, more real secrets)
- Broader browser / profile detection
- Expanded tokens (Discord, Telegram, gaming, cloud/API patterns)
- Expanded wallets (desktop wallets + known extensions)
- Wallet files collected when possible
- Password managers, VPN, RDP/mRemote coverage improved
- Email / Outlook token handling improved
- History, downloads, secret-file hunt
- Clearer Tokens and Wallets table columns

Keylogger

- Start / Stop Logging (clear on/off)
- Live stream to panel
- Offline disk log + Pull Offline
- Stop on close optional (default: close keeps running)

Builder - User setup

- Default user install stacks multiple persistence methods (no admin)
- AppData copy, hidden attributes, Run key, Startup shortcut
- Additional stealth startup where policy allows

HVNC

- Operator-chosen scale is now respected
- High-latency streaming more stable
- Browser discovery improved on Server / elevated contexts

Remote Desktop

- Reduced disconnects when the link is slow or the desktop stream is busy

Curs3d - August 19, 2026, 12:43 pm

This looks great my man! Love that the scan detection is low. GUI is clean. Good work!

DarkCore - August 20, 2026, 12:04 am

Updates 8/20/2026

[Video: <https://vimeo.com/manage/videos/1219779155>]

HVNC

- HVNC can open a dedicated media channel on start
- Browser windows are draggable (Chrome / Edge / Firefox title bar and empty tab strip)
- Unchanged desktop skips a full re-encode
- First JPEG is kept small so the first paint actually arrives on slow links

Bot Killer

- Scan tolerant for low-RAM machines
- Scan recovers and keeps going instead of aborting the whole run
- Leaves the bundled Tor helper alone

Remote Shell

- Commands with spaces / quoted paths run correctly
- UTF-8 / non-English output no longer garbles
- Command timeout is reported instead of hanging
- Larger command box and up to 1 MB of result text

cltrade - August 21, 2026, 3:48 am

Looks interesting.

Do you mind sharing the email clients it grabs from and the versions?

Inbtw, I'd like to have a vouch copy.

Sticky Bot - August 21, 2026, 8:00 am

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Sep 4, 2026. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

DarkCore - August 21, 2026, 1:26 pm

can i get vouch copy

Works with TOR, Remote Desktop & HVNC are adaptive to this type of build.

Dm me for vouch copy, first reach telegram.

Mon 24 Aug

New Feature: (BETA) - DarkCore Browser

- Bound 1:1 to the victim IP; Clients shows the running browser and its tunnels

- Reverse proxy stops when the last browser on that session closes
- Darkcore Browser: stolen cookies inject, any URL uses the client IP, browse gently, beta
- Sites list is session cookies only (Gmail, Outlook, eBay, etc.), not tracking junk
- SOCKS admit-family: only the site you opened uses the victim proxy

Emails

- Thunderbird / Mailbird IMAP with XOAUTH2 adjustment.
- Outlook web only when ESTSAUTH is in the jar
- OneAuth is treated as not a web session (no login loop)
- Expired Edge password is detected instead of spinning forever
- Personal Microsoft “not a work/school tenant” / IMAP-blocked accounts are labeled instead of failing silently

Remote Desktop

- Quality slider 75-100 added.

HVNC

- Unicode window titles (Chinese clients) match file manager.
- Per-client intelligence settings remembered.
- File manager UTF-8 paths.

Sunday 23 Aug

- Reverse-proxy tab redesign.
- Module-delivery retries.
- Intel RAM tiers.
- WhatsApp restore path.

Saturday 22 Aug

- DarkCore Browser as a session viewer creation(Sites / Emails).
- Thunderbird and Mailbird OAuth refresh -> IMAP XOAUTH2, not Outlook Web
- Steal Email rows with portable OAuthRefresh passed into the browser JSON
- Email tab: Open Inbox

Friday 20 Aug

- HVNC first frame on far RTT encoder improvement.

Updates 8/22/2026

Stealer

- Thunderbird, Mailbird, Outlook, eM Client recovery added.

x64assembler - August 25, 2026, 9:14 am

HVNC seems kind of laggy.

DarkCore - September 1, 2026, 10:59 pm

2026-09-01 - V 2.1 (Auto Update)

- Additional server side security integrated.
- HVNC browser cloning without closing the real user's browsers.
- HVNC Gmail workaround (live profile path).
- HVNC extra browsers when installed: 360 Chrome, 360 SE, QQ, Sogou, Cent, Liebao, Maxthon,

Floorp, Atom, UC Browser.

- HVNC finds those browsers on other drives and typical RU/CN layouts (not English Program Files only).
- HVNC Opera / Opera GX removed from the launcher (will be added back later).
- Remote Shell interactive PowerShell (CMD/PowerShell toggle, real runspace).
- Custom UAC names added (visible path) (ex; Windows Updater.exe).
- PowerShell scripting commands in Remote Shell.
- Hosts file editor in Remote Shell on full-admin elevated sessions.
- Run .vbs / .bat / .ps1 from Remote Shell (paste or upload).
- WinRE Module work has been started
- Stub Update to v2.1.1

clark.dll - September 2, 2026, 7:30 pm

So how does this work C2 wise? Is there a dashboard that you can access to see slaves or does it just send traffic back to your IP that you register during setup?

DarkCore - September 2, 2026, 9:06 pm

(Sep 2, 2026 07:30 PM)clark.dll Wrote: [\[CITE\]](#) So how does this work C2 wise? Is there a dashboard that you can access to see slaves or does it just send traffic back to your IP that you register during setup?

The server is hosted by you in a VPS/RDP setting preferably, all traffic goes to your box.

Magni Tech - September 7, 2026, 3:05 pm

start contract with DarkCore and backing after view day to confirm functionality of the product.

Sticky Bot - September 7, 2026, 6:54 pm

DarkCore - September 8, 2026, 5:02 pm

Module Delivery (Panel + Stub 2.2.3) - 9/8/2026

- New stubs use LZ4 compression within session AEAD, followed by 64 KB slices. This improves throughput and allows PING messages to run between slices.
- Module delivery is faster.
- Reconnect hash skip (MODULE_HAVE): already-mapped modules are not resent.
- Vault CDN fetches run in parallel, with up to six concurrent requests.
- Older stubs remain supported: version 2.1.9 and get v1 compatibility.
- Initial module synchronization is improved and is faster on reload.

Connect Balloons / Telegram

- Telegram settings are now a dedicated tab (Server / Display / Telegram).
- Controls include enable, bot token (show/hide), chat ID, Test, and a LIVE / INCOMPLETE / OFF status badge.
- Separate filters are available for new clients versus reconnects. Desktop and Telegram filters are independent.
- Telegram messages use a card layout and include flag, country, IP, OS, RAM, Admin/SYSTEM, Tor, stealth, and campaign.

Ink Builder - Dropper

- Metamorphic generation on each build.
- Clone icon support.
- Optional PDF decoy.

https://www.kleenscan.biz/runtime/scan_result/0da93216c035d130fee1b787ca45c6526274e05e88405cc8b1f342c5c153c186

HVNC and RDP

- All active monitors are automatically set to 100% DPI scale so video quality and HVNC scaling are preserved.

Stub Changes

- General stability improvements.
- HVNC/RDP streams can drop frames under load without terminating the client.

Fixes

- Minor panel setting bugs that prevented settings from saving have been corrected.
- Rapid port changes previously stacked Stop/Start operations on the same socket (TIME_WAIT / WSAEADDRINUSE). A failed bind could leave the port held.
- Restart now applies only the last requested port.
- Language selection has been moved to the initial launch screen and runs only once.

Translation

- Translation has been added to all of the new interfaces

Compatibility

- Older clients and stubs remain compatible with this update. They will not receive the features introduced or improved in this release.

DarkCore - September 11, 2026, 11:29 am

Last 2 days of promotion then pricing will return to regular prices:

[+] 1 MONTH: \$150

[+] 3 MONTHS: \$350 (-22% cheaper than monthly)

[+] 1 YEAR: \$1,000 (-44% cheaper than monthly)

Don't miss out!

Magni Tech - September 11, 2026, 2:54 pm

NoAccess123 - *September 15, 2026, 9:33 am*

Hi,
Just initiated the contract and purchased the RAT from the autopayment link,

Looking forward to the amazing tool.

Sent you the dm.

Thanks

DarkCore - *September 16, 2026, 11:09 am*

DarkCore - v2.3.2 — 16.09.2026

NEW: Hidden Remote Desktop has been added (hRDP)

This update moves the system to the TOR network for improved operational security and anonymity.

Note: this does not affect the deployment of your modules; the network is only used for the license server and module downloads at DarkCore startup.

Panel

- Licensing, CDN, and updates now operate through the Tor panel.

Builder

- Added a fallback TCP C2 address retrieval via Pastebin in case the primary C2 IP is unavailable.

HVNC / Remote Desktop

- Windows update simulation screen with dimming effect (for HVNC and RD) - includes a preview

(~5 sec) + send option, a timer (in minutes), and a loading animation styled after Windows 11.

- Additional keys (Ctrl/Alt/Del/Esc, etc.) have been moved to the bottom of the interface.
- Fixed a bug where the Firefox clone download for HVNC would stall at 90%.

Miscellaneous

- The Clipper in the Autotask section now retains settings after restart.
- Added ZIP archive and file transfer interface in the file manager

PD; We are no longer offering vouch copies of this product.

DarkCore - September 20, 2026, 10:38 am

Partnership with KarmaCrypt - <https://hackforums.net/showthread.php?tid=6327207>

Our product is now compatible with Karmacrypt after speaking with their developer.

DarkCore - v.2.6.6 - 20.09.2026

- Silent UAC Bypass added.
- hRDP: isolated reverse proxy, does not use the main reverse proxy function.
- Remote shell: PowerShell no longer fails writing a temp script. Command output always returns.
- Stealer: Queue system integrated for tasks & more fluent data collection
- Darkcore Builder is now simplified: Simple Tor generate; Simple / Advanced / Crypt and (?) help in all languages.
- Fake Update: white text no longer flickers.

ImComplexed - September 26, 2026, 8:15 am

I performed runtime tests on this software using my crypter and the client's file. The bot is fully compatible with my crypter. In my tests, it ran without being detected by the antivirus software I tested.

I tested it on Windows 11 with Microsoft cloud-based protection, Avast and eset . I'll share a few videos to support these results.

Win 11 + defender - <https://streamable.com/fvtthm>

Win 11 + Avast - <https://streamable.com/j4hcy1>

Win 11 + Eset - <https://streamable.com/v1565y>

Please note that I tested only the file's compatibility with my crypter and its runtime behavior against the tested antivirus software. I did not test the bot's features or functionality.

DarkCore - September 29, 2026, 6:58 pm

DarkCore — v.2.8.2 — 23.09.2026

- Help Section added with english documentation, rest of translation is pending.
- .lnk Converter tab moved inside advanced section of the builder.
- File Manager module will allow now sending large files in pieces, so a big transfer is not cut off.
- Uninstall feature now correctly removes persistence if any was selected.
- A new indicator if the victim has a camera or not is displayed in the connections tab.
- Categories have been added to the connections tab to separate your victims by operation.
- Statistics section now has a summary.
- Simple builder starts with Stub form. A regular stub drops a file and runs from that location when Installation is on.
- ? Stealth Injection is fileless: the payload runs inside a host process and is not installed as the client on disk.
- Compatibility: Modules have been modified to work properly with memory injection (stealth injection stub).
- Stability Upgrade for all client stub, recommended upgrade - Improvements for windows 11 sub-systems.

DarkCore 2.9.5 - 27.9.2026

Modules

- Module security improved, v2 is now deployed.
- The panel downloads both the older module set and the new one.
- A client on 2.3.4 or below uses the older set. A client on 2.9.0 or newer uses the new set.
- The panel opens while those files are still downloading.
- Modules stay gray until the set that client needs is finished, then they turn on by themselves.
- The log shows download progress and a notice while tools are locked.
- The loading screen shows Current modules and Legacy modules, each with its own bar.
- A note under those bars says legacy support runs through 1 December 2026.
- A live Remote Desktop or HVNC session is not unloaded just to send the same module again.
- The offline keylogger keeps a copy on disk until the panel has received it. A pull does not wipe that copy first.
- Fake Update stays on the main monitor.

Tor

- HVNC is not available on a Tor client. The window says so, due to latency.

Panel

- The Tor mark, the port mark, and the block mark are built into the panel.
- Camera off stays centered and is remembered after a restart.
- Notification sounds include the built-in tones and your own audio file.
- A rush of new clients is one notice and one sound.
- Statistics count machines, not every reconnect.
- The language picker text is centered.
- Minor aesthetic improvements to the panel

ChargedP - October 3, 2026, 1:10 pm

All features work as expected, extremely well made for the price and there seems to be a very healthy amount of updates as well. 10/10

drewkasp - October 6, 2026, 6:25 pm
