Thread: [LOOKING TO CREATE AN IPTV SERVICE NEED GOOD CODERS ASAP WILLING TO SPLIT PROFIT](#)

perk. - August 12, 2026, 6:24 am

hello guys!

I have stumbled upon an idea and am looking for some experienced coders and people to work with.

the idea I have is to setup an iptv service and promote using various email and SMS campaigns possibly throughout various online forums such as reddit possibly even places like telegram and discord

I am looking for experienced coders and people who know how I can market a product like iptv with it being a grey area. my main role in this project will be marketing as I have little experience with coding , designing websites etc..

I saw a thread from a member of this forum explaining how he managed to make 5 figures in one month using this method during the world cup so I believe there is a way we can create a generous amount of cash by selling iptv

if you are looking to work with me and have experience in any of the topics I have mentioned then feel free to drop me a message
