I'm pretty sure this script I made still works.

Jamika - August 17, 2026, 4:17 pm

sorry for being rude , but the one you brought is very ugly

You're right, we should use Bliss.

Whilst I hate the hackforums bg, I most definitely hate your suggestion more.

CanadianEy - August 21, 2026, 10:51 pm

I love the Hack Forums background. It blends very well with the rest of the colors.

The current background looks slick. It's dark and gives off serious hacker vibes. I'm kind of a nerd, so I'm staring at terminals all day. Some folks are all about Windows and see that wallpaper nonstop, but real pros don't use Windows at all.

I'm trying to imagine [Serialcode](#) suggestion in reality. I just can't see it looking good at all.

Mix - August 23, 2026, 10:13 pm

Op I am sorry to say this would look very out of place.

[Omniscient](#) has done well to get the background to fit the theme of the site.

OMG, I should totally add that background option.

Including the [8 Beta Fish](#)
