WHAT IS THIS?

ToucanSim ([toucansim.com](#)) sells travel eSIMs — data plans that a traveller installs by scanning a QR code, no physical SIM, no roaming bill. Delivery is instant and automatic: the customer pays, the eSIM lands in their inbox seconds later.
You don't buy stock, you don't handle delivery, you don't do support. You share a link. When someone buys through it, you get paid a share of the sale.196 destinations — country plans, day passes and regional plans

Instant automated delivery — nothing for you to fulfil

We handle the customer — payments, delivery and support tickets are ours

Free to join — no fee, no monthly cost, no sales quota

??

REVENUE SHARE — WHAT YOU ACTUALLY EARN

Every plan pays revenue share, including the cheap ones most programs quietly exclude. Real figures from the live catalogue:

Code	PLAN PRICE	YOU EARN	REV SHARE

\$2.99	\$0.47	15.7%	
\$5.99	\$1.13	18.9%	
\$9.99	\$1.96	19.6%	
\$16.99	\$3.28	19.3%	
\$34.99	\$6.58	18.8%	

Typical range: 15% - 20% of sale priceWhy it isn't one flat number: card processing takes a fixed fee out of every transaction regardless of size, so the very cheapest day passes pay a little less. Rather than advertise a flat % that would be false on those plans, we publish the real spread — most sales land between 15% and 20%.

Your exact share is shown per sale in your dashboard, so you can always see what you made and on what.

??

90-DAY COOKIE — THE PART THAT ACTUALLY MAKES YOU MONEY

Travel purchases are not impulse buys. Someone reads about Japan eSIMs today and books their trip three weeks from now. You still get paid for that sale.90-day attribution window. Anyone who opens your link is credited to you for the next 90 days — not one session, not 24 hours.

First-party cookie. Set on our own domain, so it isn't binned by the third-party-cookie blocking in Safari, Firefox and Chrome that quietly kills a lot of affiliate links.

Survives the return visit. They can close the tab, come back days later from Google, a bookmark or a different page — the credit is still yours.

Your rate is locked at the moment of sale. It's stamped onto the order, so a future rate change can never rewrite what you already earned.

Works on any URL. Add ?ref=YOURCODE to any page and send people straight where they need to be:

Code <https://toucansim.com/?ref=YOURCODE>
<https://toucansim.com/plans/japan?ref=YOURCODE>
<https://toucansim.com/plans/turkey?ref=YOURCODE>
??
YOUR DASHBOARD
Sign in at reseller.toucansim.com any time: Clicks, sales, earned to date, owed to you — live, no waiting for a monthly statement

Click-to-sale conversion % so you can see which traffic is actually worth your time

Every sale itemised — date, destination, plan price, what you earned, your rev share on that order, payout status

Sales appear within seconds of the customer paying

Withdrawal history with amount, method and reference

??
GETTING PAID PayPal or cryptocurrency — your choice, changeable any time

\$10 minimum withdrawal (below that, transfer fees eat most of it)

Request a withdrawal whenever you're above the minimum — your balance carries over until then

Commission is owed on orders that complete. Refunded or failed orders earn nothing, because the money went back to the customer

??
