yeahbuddy - August 31, 2026, 4:44 pm

Do you also have image generation/image editing LLM uncensored APIs or?

G Reviews - September 3, 2026, 11:17 am

This would have been very interesting if the op was around to explain a few more things.

"DeepSeek v4 Pro (Uncensored)"

If you're still offering trial credits, I'd be curious... I work on/with ablated models all of the time, and am very curious about that offering.

I saw "HQ members can get some free tokens as a vouch copy (DM @ogsadly on Telegram with a link to your HF profile)", but I no longer have a TG... Might get one but you can PM me here too.

Can you prove what you're saying at all? You've never contacted me about this, we give out free tokens precisely so you can see the models are all real.

You've never messaged me on anything.

OtterLover - September 5, 2026, 8:14 pm

I'll try it out and leave a review.

I tried using it. With the latest models, there are many retries. Sometimes it works well, and sometimes it doesn't. Currently, the Fable and Opus 5 versions are not working well.

Other lower-tier models also generate API 402 errors. I can't get the work done properly.

It is currently operating quite stably.

Skidsuper - September 6, 2026, 3:25 am

Promising, saving this to wishlist.

I need fable 5.1 how can I buy the api?

Stanley - October 10, 2026, 12:53 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for

each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
