Relatively the same as anybody else, I suppose. I can't readily think of anything negative to report, but then again, I'm a chronic optimist, or at least a practicing one.

Dec 2010... Nice.

How did you find out about HF?

For me, I think it was during a GTA SA:MP session. A friend mentioned it in chat. I was in high school, learning basic coding. I know over a dozen programming languages now.

I have fond teenage memories of this forum.
