Thread: [NemesisCrypt | .APk and .EXE Files| .VBS .JS .LNK .XLM \(macro\) FUD!!](#)

Consecration - August 25, 2026, 2:35 am

I am now offering my crypting service to the community after a long hiatus. I will be handling both .apk files for Android and .exe files for Windows. I am providing two (x2) vouch copies for reputable users to test the quality before purchase. This crypting process ensures robust obfuscation and helps your applications remain fully undetectable against major antivirus engines, letting them run without interruptions. You can contact me directly here via private message or on my Telegram

\$50 per .apk

\$35 per .exe

Also i'm doing sideloading for your .exe file

Telegram: NemesisSoft

After couple of sale price will be increasing.

For the exe, do you provide other outputs like .js?

If yes, I'm interested in the vouch

For now the output is in .exe.

You can hit me up on tg I'm implementing the .js ,ps1, .bat, .lnk out .
