Wage - August 25, 2026, 3:47 pm

? GivvyDiddy — #1 Giveaway Automation Tool ?

Automate and manage giveaway fleets of up to 50 phones from one Portal

Ready to automate your giveaway fleet?

[contract=tid]Start Contract[/contract]

? Win More Giveaways at Scale

GivvyDiddy helps you automate giveaway entries across an entire fleet of supported phones.

Compete for prizes including:

? Gift cards (Amazon, Starbucks, and more)

? Pokémon singles and sealed packs

? Sports singles, boxes, and packs

? Jewelry and collectibles

? Electronics, accessories, and more

Depending on your fleet size, giveaway availability, and results, the combined face or market value of prizes can potentially reach hundreds of dollars per day.

Instead of manually monitoring and entering giveaways on every phone, GivvyDiddy handles the repetitive work while giving you centralized control through the Portal.

Results vary. Prize value and earnings are not guaranteed.

? Real Portal Results

The following results come directly from Wage's GivvyDiddy Portal.

Across 12 complete tracked days:

? \$2,079 total recorded prize value

? \$173.25 average recorded prize value per day

? 376 total giveaway wins

? 31.3 average wins per day

Average Results by Available Phone Count

10–13 available phones

? Average recorded prize value: \$139.25 per day

? Average wins: 24.5 per day

? Observed daily range: \$56–\$241

? Sample: 4 complete days

18–19 available phones

? Average recorded prize value: \$166.75 per day

? Average wins: 31 per day

? Observed daily range: \$106–\$221

? Sample: 4 complete days

20–21 available phones

? Average recorded prize value: \$213.75 per day

? Average wins: 38.5 per day

? Observed daily range: \$192–\$233

? Sample: 4 complete days

These figures use the Portal's assigned gift-card face values and estimated prize values.

For this comparison, an available phone is represented by a distinct phone account that successfully completed at least one giveaway entry that day. Phones that remained unavailable or cooldown-blocked for the entire day were not counted.

These are historical results from one operator—not guaranteed future earnings. Results can vary significantly based on giveaway availability, categories, seller activity, fleet uptime, account condition, configuration, and luck.

? Portal Proof and Winning Screenshots

The screenshots below show real Portal statistics, recorded wins, prize values, and fleet activity.

? What Is GivvyDiddy?

GivvyDiddy is a multi-phone giveaway automation and fleet-management system. It combines a Windows agent with an online Portal, allowing you to manage supported phones, targeting preferences, sellers, categories, and results from one place.

Every commercial subscription includes:

? Giveaway automation across your licensed phones

? Online fleet dashboard and controls

? Separate commercial seller list

? Seller priorities and exclusions

? Category priorities and exclusions

? Skip-seller controls

? Private seller notes and favorites

? Subscription Portal and access history

? Software updates while your subscription is active

? Plans and Pricing

STARTER — UP TO 10 PHONES

30 Days: \$150

1 Year: \$1,650

Founder: \$3,000

FARM — UP TO 25 PHONES

30 Days: \$350

1 Year: \$3,850

Founder: \$7,000

PRO — UP TO 50 PHONES

30 Days: \$750

1 Year: \$8,250

Founder: \$15,000

Choose your plan and start a purchase contract below.

[contract=tid]Start Contract[/contract]

? Founder Licenses

A Founder license is a one-time purchase with:

? No subscription expiration

? Lifetime software updates

? Access for the remaining operational lifespan of the GivvyDiddy project

? Your selected 10, 25, or 50-phone limit

? Limited availability

“Lifetime” refers to the operational lifespan of the GivvyDiddy project—not the lifetime of the purchaser or a guarantee that the project will operate forever.

Founder licenses do not require renewal while GivvyDiddy remains operational.

? Accepted Payment Methods

We accept the following major cryptocurrencies:

? Bitcoin (BTC)

? Ethereum (ETH)

L Litecoin (LTC)

? Tether (USDT)

Trusted Hack Forums members may also be approved to pay using:

? Cash App

? PayPal

? Zelle

Cash App, PayPal, and Zelle are available only to trusted members and are approved at our discretion.

The accepted cryptocurrency network, payment address, and exact payment amount will be provided inside the contract. Do not send payment until the instructions have been confirmed in the contract.

? How to Purchase

1. Register a GivvyDiddy Portal account.
2. Verify your email address.
3. Choose your phone limit and subscription term.
4. Click the Start Contract button below.
5. Include your Portal email address, selected plan, subscription term, and preferred payment method in the contract.
6. Wait for the payment details to be confirmed inside the contract.
7. Submit payment using the confirmed asset, network, or approved payment service.

8. Once payment is confirmed, your single-use subscription key will be delivered through private contract or DM.

Only send the requested cryptocurrency using the specified wallet address and network.

Cash App, PayPal, or Zelle payments must be approved before payment is sent.

Never send anyone your Portal password.

? START A SECURE PURCHASE CONTRACT

[contract=tid]Start Contract[/contract]

? Redeeming Your Key

1. Sign in to the GivvyDiddy Portal.
2. Open Subscription from the navigation menu.
3. Paste your key into the Subscription Key field.
4. Click Redeem Key.
5. Confirm that your plan and phone limit are displayed correctly.

Subscription keys are single-use. Once redeemed, the license is attached to that Portal account.

Standard subscription keys may be redeemed early. Additional subscription time is scheduled after your existing access instead of replacing unused time.

? Refund and Replacement Policy

Digital subscription-key purchases are generally final after redemption.

A refund or replacement may be provided when:

- ? Payment was received but no valid key was delivered.
- ? An unredeemed key supplied by us is invalid, expired, or revoked.
- ? The delivered key does not match the confirmed contract.
- ? A duplicate payment was made for the same contract.

Refunds are generally not provided for:

- ? Redeemed subscription or Founder keys

? Unused subscription time

? Different-than-expected earnings or prize results

? Customer hardware, internet, account, or configuration issues

? Third-party account restrictions, suspensions, or platform changes

? Cryptocurrency sent using the wrong asset, wallet address, or network

? Payments sent before the payment method and instructions were confirmed in the contract

If an unredeemed key is lost, open or update your contract with proof of purchase. The original key can be revoked and replaced.

Any approved refund will be documented and completed through the associated contract.

? Important Notice

GivvyDiddy does not guarantee earnings, wins, giveaway availability, account status, prize delivery, resale value, or continued compatibility with third-party platforms.

Any dollar amounts discussed represent estimated gift-card face value or estimated prize value—not guaranteed cash income. Results depend on fleet size, seller activity, giveaway availability, account condition, configuration, luck, and other factors outside GivvyDiddy's control.
