Thread: [Twitter ADS \\$200 / Free X.ADS Accounts Checker / Twitter X Blue](#)

mauricio17 - August 26, 2026, 3:52 am

Twitter accounts with a \$200 credit limit that can be spent on ads are for sale.

Geo: USA

Origin: Personal farming

1. There is also a free checker to verify if your ad account is valid. The checker analyzes your account, reports the reasons why it is not ready for ads, and gives practical advice on farming specifically for your account. It also indicates whether the account is completely blocked and unsuitable for ads or fully ready for ads. This is a convenient all-in-one tool that helps to warm up your account so that ads can be launched without manual moderation. We prepare the account in such a way that it goes to automated verification and easily passes it automatically. The verification methods are built on personal experience and intercepting secret developer packets for accurate determination. At the moment, the checker provides correct information with 97% accuracy.

2. It is possible to create unique links in 5 seconds that will suit any ad platform (Twitter, Facebook, Google, Bing, etc.). This is a custom-built cloaking service that has been battle-tested and leaves no chance for ad network bots. Create a link - insert it into the ad - get approval.
