Thread: [offering 50% profit-share to learn a real money-making method](#)

haku - August 26, 2026, 12:17 pm

Hey all — I'm looking for someone experienced to teach me a money making method.

I'm not asking for free info or a course. I'm offering to actually do the work — research, execution, grunt tasks, whatever's needed — in exchange for you showing me how it's really done. Whatever I make you get 50%

I don't care what the method is I just wanna make money and I'll give you half of whatever I make, I have got time, a lot of it and im willing to invest all of it in your method so you'll be getting a lot of money depending on whether its really working or not.

There are mad ways to make money online, bro. Just figure out what people wanna buy, scroll through the forum, and see what's selling. Then try to recreate it and offer something similar. It's really that simple.

It doesn't always pay off, ofcourse selling is a good way but to compete its not that easy.. I'm just looking around maybe someone has a good method and we can both make good money him by sharing is and my by splitting the money.
