Is there any real money making method in this forum at all??

i just paid for over 10 eBooks in this forum and the only interesting thing is the title, the content were practically downloaded from google.

It all garbage and nothing works

Can someone point me to an eBook that actually works and not the usual BS to take my bytes???

No one's going to sell you the thing that's making them 10k a month that easily.

Spend on your skills brother. That's what gets you paid,

the \$10k is even an approximate value to create attention, but how come 99% of moneymaking ebooks here contain trash and none work

Sad but true. You're better off discussing with ai, and get more shitty ideas :)

yeah there is but it's not simple, money making online is mainly by dropshipping / content creating / or reselling

search yourself the real working ways nobody will give you his working way and create a competitor for himself
